3M™ Red Dot™ 2271 Monitoring Electrode

A high performance soft cloth electrode.

The 3M™ Red Dot™ 2271 Monitoring Electrode is designed specifically for stress test, telemetry, Holter and Coronary Care monitoring procedures. Its excellent performance is due to a moisture-activated adhesive which provides long term adhesion on both dry and moist skin.

3M is dedicated to providing the highest level of educational provision to promote your learning. Please click here for your free educational CD.

Product Benefits

- High permeability ensures normal skin function beneath the electrode
- Skin adhesive acts quickly to provide secure, firm skin contact
- Delivers good long term adhesion, important for Holter and Coronary monitoring
- 3M™ Moistac™ Adhesive provides increased adhesion in the presence of perspiration
- Conformable and low profile to deal with the most challenging patient contours
- Built-in abradar disc prepares the skin easily and effectively for good trace quality

Suitable for use in

- Stress Tests
- Telemetry
- Holter
- Monitoring in Coronary Care Units
