One Piece Shrouds

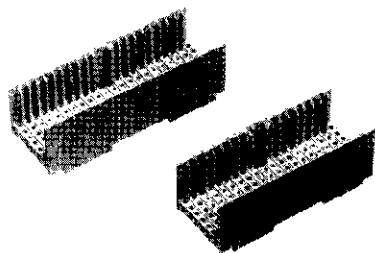

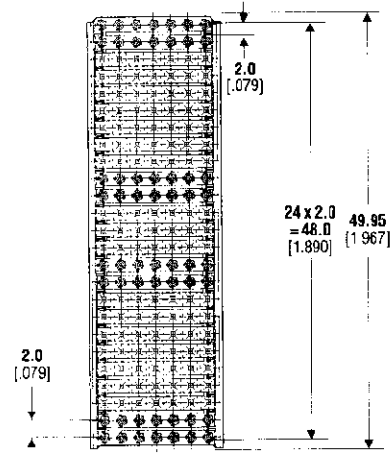

Type A, B, C, D, E or F Shrouds

One piece shrouds can be used with several backplane thicknesses to provide required pin mating levels (see chart for options available). The single piece design also provides a reduced part count, lower applied cost solution.

Type A

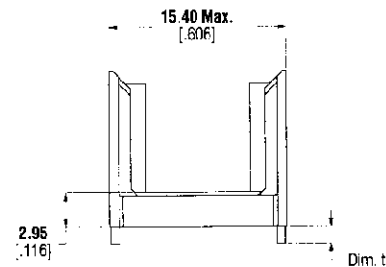

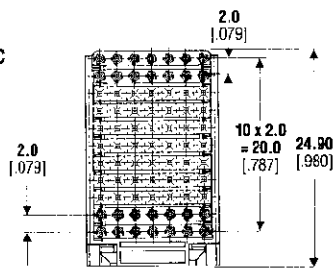

Type B

Type AB Shrouds

Type AB shrouds require male feed thru connectors with short tail or vacant ground pin positions in the guide feature locations.
