Isopropyl Alcohol Wipes

Isopropyl Alcohol (IPA) Wipes remove solder paste, inks, and other contaminants. Alcohol wipes are ideal for all general cleaning applications. Alcohol wipes are well suited for touch-up cleaning of automatic printer stencils and cleaning of semi-automatic printer stencils during and at the end of production runs. IPA wipes contain ultra-pure Electronics Grade IPA. Isopropyl alcohol wipes are available in a C-fold wipe contained in a convenient dispensing box, or in a pull through the tub.

Because of the spike in demand due to COVID-19 (Novel Coronavirus), isopropyl alcohol products will be in short supply for the foreseeable future. In the interim, these products will not be offered for sale directly from this website, and samples are not available for testing.

For electronic assembly and rework and for industrial degreasing, click [here](#) for product alternatives that are readily available. Please note these products do not have antiviral properties.

FEATURES & BENEFITS

- Ultra pure mixture of IPA and deionized water
- Strong, will not tear, shred, unravel or lint
- Holds up to the most rigorous scrubbing
- SIP125P, SIP100P and SIP91P pull-up presaturated wipes are ideal for cleaning of semi-automatic printer stencils, and touch-up cleaning of automatic printer stencils
- IPA100B wipes are lint free and precut –excellent for cleaning fine pitch stencils
- Plastic safe

APPLICATIONS

- Presaturated Wipes are well suited for touch-up cleaning of automatic printer stencils and cleaning of semi-automatic printer stencils during and at the end of production runs.

Part #	Size	Units Per Case	Price Per Case	Add To Cart

How to Avoid Products with Methanol Contamination

Note: Chemtronics does not manufacture or sell hand sanitizer, but offers alcohol-based products that are commonly used for surface cleaning. The FDA has issued a warning about methanol contamination in over 75 different hand sanitizers on the market. Methanol is a toxic alcohol that can contam...
