Information:

Premium HDMI Cable Certification Program

Premium High Speed HDMI Cables Tested to Ensure Quality for Feature-Rich 4K/UltraHD Content

Products are reaching the market with the latest HDMI-enabled high-performance digital audio and video features, and a vital component in successfully delivering those features is the HDMI cable. The Premium HDMI Cable Certification Program is the new program from the creators of HDMI technology. It encompasses additional and enhanced cable testing as well as an authentication and verification program.

Cables are tested to ensure they support the full 18Gbps bandwidth from the HDMI 2.0b specification plus an EMI test to ensure cables minimize interference with wireless signals.

What is the Premium HDMI Cable Certification Program?

The program is designed to give end users confidence when purchasing new HDMI cables for their 4K/UltraHD products that may include features such as 4K@60Hz, BT.2020 and HDR.

Participating HDMI Adopters can promote their ATC-tested High Speed HDMI Cables as Premium High Speed HDMI Cables or Premium High Speed HDMI Cables with Ethernet using a unique anti-counterfeiting authentication label on their products.

For more information view [Premium HDMI Cable Certification Program](#).

ABOUT CALRAD ELECTRONICS

Calrad Electronics has been in the same family ownership for over 60 years. Many of our employees have been with the firm for 25 or more years. Many of our customers have been buying from Calrad for even longer than that. Our manufacturers and suppliers in Asia have known and trusted Calrad for generations. It all started in the 1950's . . .
