

## T7512BS Series Bright★Pipes™ Flexpipe™ Fiber-Optic Lightpipe Description and Features

- Flexible optical lightpipe with precision fiberoptics for long distance SMT LED to lens.
- Eliminates need for precision mechanical alignment of components to panel.
- T7512B8 is designed for use with CMD67-21 and 67-22 series Bright Chip LEDs.
- Precision engineered with ray tracing for bright, optically precise even indication and attractive appearance.

- ESD protection from circuitry for exceptional reliability.
- High contrast and wide viewing angle for greater visibility.
- Parts inserted after reflow to permit LED pad inspection before assembly.
- Large lens provides high visibility.
- Water clear optics for variety of LED colors.

**Note:**

- Due to their complex nature, all Flexpipe™ pads must be custom designed to meet your application needs.
