

Pluggable terminal strips for printed circuits

Color: black - 5mm / light grey - 5.08mm
 rated cross section 2.5 mm²

solid/fine stranded
 rated voltage 250V~, 300V ==
 (VDE 0110 Gr. C)

UL ratings: AWG No 22-12 300V 15 A
 CSA ratings: AWG No 22-12 300 V 15 A

MATERIALS:

Insulating housing: polyamide, flame resistant
 UL 94 V-0 continuous temp. 100°C

Clamping body and clamping screws: copper alloy, nickel plated

Solder pins and contact springs: tin plated bronze

All metal parts are either recessed or enclosed in the insulating body, providing circuit protection and dead-front safety. The terminal block connectors are provided with captive wire protection, and the terminal screws are captive and secured against loosening.

spacing 5 mm: standard color: black.

spacing 5.08 mm: standard color: light grey

Z5.523.2453.0

Pluggable terminal strips for printed circuits 2.5mm²

Color:black - 5mm / light grey - 5.08mm
rated cross section 2.5 mm
fine stranded
rated voltage 24
rated current 2.2 mA per display

Description:
The 8113 "Top" plugs are designed with the clamping screw access parallel to the wire entry port. This is of special importance when used in restricted areas where a standard right angle configuration would be awkward or even impossible, such as stacked or panel mounted PC boards.

The 8113 TOP series features an insulating body of Polyamide 6.6; temperature range up to 100°C; a flammability rating of UL94 V-O, fully backed out clamping screws of zinc plated and chromated steel and galvanic tin plated bronze contact springs and solder pins.

The LED version is used wherever visual indication of the circuit condition is required.

spacing 5mm: standard color: black

spacing 5.08mm: standard color: light grey

Type 8113 B/..TOP LED

spacing 5 / 5.08 mm

Top plug connector LED
with one negative pole

Wire strip length: 5.5 mm
