Heavy Duty Hygro-Thermometer
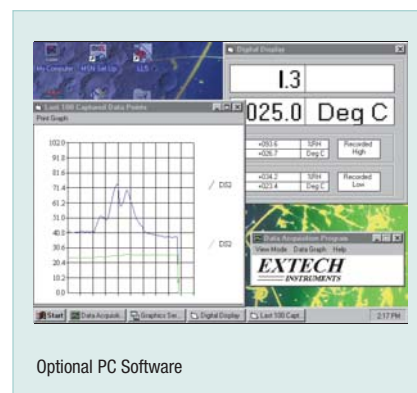

✓ *Dual display of Relative Humidity and Temperature*
With PC interface

Features:

- Fast response from 10 to 95% RH
- C/F switchable measures temperature from 32 to 122°F (0 to 50°C) with 0.1° resolution
- Utilizes high precision thin film capacitance sensor for RH and thermistor for temperature
- Accurate to 3% RH; 1.5°F/0.8°C
- Data Hold and Auto Shut off
- Super large 1.4"(36mm) LCD display
- Records Max/Min and AVG readings
- Built-in RS-232 PC serial interface with optional Data Acquisition software and Datalogger
- Dimensions:7x2.9x1.3"(178x74x33mm); Weight:18oz (510g)
- Complete with remote 6.25"(159mm) probe with 36" (0.9m) cable, protective rubber holster, 9V battery

Interface Options:

- Optional Windows® compatible Data Acquisition Software and serial cable enable user to display and capture readings on a PC, and set time intervals
- Optional battery operated Datalogger module stores over 8000 readings for later transfer to a PC

Optional PC Software

Ordering Information:

407445....................Heavy Duty Hygro-Thermometer
407445-NIST ....Heavy Duty Hygro-Thermometer with NIST Certificate

Accessories:

407453....................33% RH Calibration Reference
407465....................75% RH Calibration Reference
156119....................117 VAC Adaptor
156221....................220 VAC Adaptor
409997 ....Soft Vinyl Pouch Carrying Case
140001 ....Hard Vinyl Carrying Case
407001 ....Data Acquisition program and cable
