

# Poly Tuff<sup>®</sup> I and Poly Tuff<sup>®</sup> II

## PolyTuff I

---

Rigid PVC core bonded to flexible PVC jacket.

---

All non-metallic construction ends metal fatigue and separation problems.

---

UL Listed and CSA Certified.

---

Cuts cleanly with a knife or PVC cutter so there are no jagged edges.

## PolyTuff II

---

PVC core with corrugated walls bonded to PVC jacket.

---

Handles twists, turns, bends, switchbacks and straightaways with ease.

---

All non-metallic construction ends fatigue and separation problems.

---

Can be cut with a knife or PVC cutters.

---

UL Recognized and CSA Certified.

## Flexibility and Corrosion Resistance

Hubbell Polytuff I Conduit and Polytuff II Tubing are entirely non-metallic, providing superior flexibility and outstanding corrosion resistance. Polytuff conduit and tubing comes in sizes ranging from ¼" to 2" diameter. Polytuff is made from PVC which gives you the extra flexibility for tight turns, nonconductivity, corrosion resistance and ease of installation not found in metallic liquidtight conduit.

# Poly Tuff® Non-metallic Connectors

Nylon compression nut has a tapered dome to tighten ferrule onto conduit.

Nylon locknut fastens connector securely to enclosure and provides superior corrosion resistance.

Neoprene O-ring provides liquidtight seal at hub or enclosure.

Nylon two-piece swivel body enables fitting to twist from 0° to 90° .

Non-integral ferrule provides conduit seal and superior pullout protection.

## Straight and SwivelLock® Connectors

Hubbell non-metallic liquidtight connectors are made from nylon and range in size from ¼" to 2". The nylon connectors are completely nonconductive, corrosion resistant and easier to install than metallic liquidtight fittings. The patented SwivelLock® design eliminates the need for separate straight, 45°, and 90° fittings by providing a full range in one device. Non-metallic connectors have a unique design which allows Hubbell to claim UL 50 ratings of 3R, 4X, 12 and 13.

### Polytuff Fittings

#### Operating Temperature\*

Nylon (Body, Nut, Gripping Ring and Locknut)	-40°F to +225°F (-40°C to +107°C).
Neoprene (Sealing Ring)	-30°F to +240°F (-34°C to +116°C).

#### Flammability

Fire Gas Toxicity Product Testing	Nylon PolyTuff Fittings have a UL 94V-2 rating.

#### Certifications

UL Listed	UL50 Type 4X, 12 and 13
CSA Certified	PolyTuff I Fittings, Poly Tuff II Fittings.

\*Due to the limiting factors of nylon and neoprene, PolyTuff Fittings will continuously perform in the range -30°F to +225°F (-34°C to +107°C).

# Liquidtight Conduit Connectors

Hexagonal, screw-machined steel nut.

Solid polypropylene gland-ring creates an environmental seal.

Non-integral, reusable steel, ferrule is easily installed, to seal conduit.

Threaded one-piece steel body.

Tapered, machined threads fasten securely and provide additional liquidtight sealing.

Optional insulated and non-insulated throat.

Nylon gasket provides liquidtight seal at hub.

Locknut has hardened steel tangs to grip securely.

## Insulated and Non-Insulated Conduit Connectors

Hubbell offers a broad line of metallic liquidtight fittings for use with metallic liquidtight conduits and Polytuff I. Hubbell offers trade sizes from 3/8" to 4" in straight, 45°, and 90° body designs. Most connectors are available with either insulated or non-insulated throats. Liquidtight fittings are precision manufactured to exacting standards assuring ease of use and reliability. Straight body 1/2" and 3/4" sizes are listed for UL Type 3R, 4, 12 and 13 environmental ratings.

#### Rating Code

##### A-Excellent service

No harmful effect to reduce service life. Suitable for continuous service.

##### B-Good service life.

Moderate to minor effect. Good for intermittent service. Generally suitable for continuous service.

##### C-Fair or limited service.

Depends on operating conditions. Generally suitable for intermittent service. Not recommended for continuous service.

##### D-Unsatisfactory service.

Not recommended.

All ratings apply to concentrated or saturated solutions unless otherwise specified.

Chemical resistance ratings are based upon information supplied by the raw material manufacturers. Use as a general guide only – samples should be tested by user under actual conditions.
