Gaskets For Deutsch Connectors

Seal Out Debris . . . Seal In Success

Moisture, dirt, salt, sand, and road debris can all work their way into your electrical panels through unsealed mounting flanges.

One sure way to keep these destructive elements out is by using high quality neoprene gaskets designed by LADD Industries to fit Deutsch connectors.

Rated to operate in environments from -70°F to +225°F, these rugged gaskets form a tight seal between the panel face and connector flange to keep out destructive elements.

**Keep destructive elements away from your
electrical components!**

General Specifications

Material

Neoprene/EPDM/SBR

Thickness

.025 Inch

Temperature Range

-70° F to +225° F

Flammability Specifications

UL-94-HBF

Mil-R-6130C

FMVSS-302

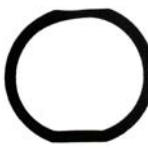

Consult LADD for further specifications.

For *Critical* and *Unsealed* Panel Mount Applications...

Depend on **LADD** Gaskets!!!
