Part Number DM163025 - PICDEM FS USB

This product can no longer be purchased. Please purchase the updated version, DM163025-1 instead.

The PICDEM FS USB Demo Kit is designed as an easy-to-use evaluation platform for Microchip's PIC18F 24/44K50 family of USB MCUs. These devices support full-speed-USB communication without the need for an external crystal, which allows significant cost savings and reduced design effort. The demo kit provides all of the hardware needed to demonstrate and develop a complete USB communication solution. Additional software is available for free at Microchip's Libraries for Applications.

Standard Pricing:

Estimated Ship Date: 10-Sep-2013
