Vision System

FZ5-Series

A range of processing items for positioning and inspection

- The High-precision Object Detection Required for Positioning
- Converting Measurement Results to Output User Units
- Easily Integrate Interfaces into the Machine
- Easy Setup with Program Scalability

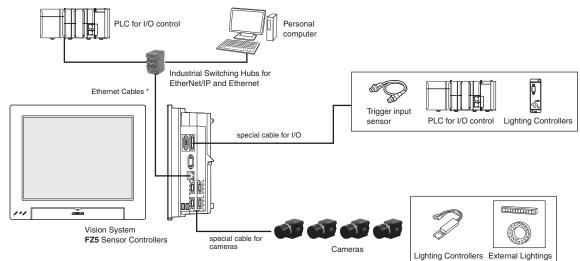

System configuration

EtherNet/IP, No-protocol Ethernet and PLC Link Connections

Example of the FZ5 Sensor Controllers (4-camera type)

^{*}To use Straight or cross STP (shielded twisted-pair) cable of category 5 or higher for Ethernet and RJ45 connector.

This can be increased up to 1024 using the Scene group conversion tool.

The image logging capacity changes when multiple cameras of different types are connected at the same time.

Do not ground the positive terminal of the 24-VDC power supply to a Lite Controller.

If the positive terminal is grounded, electrical shock may occur when an SG (0-V) part, such as the case of the Controller or Camera, is touched. The current consumption when the maximum number of cameras supported by each controller are connected.

If a lighting controller model is connected to a lamp, the current consumption is as high as when an intelligent compact camera is connected.

Weight	Approx. 240 g
Accessories	Instruction Sheet and 4 mounting screws

- *1 A 12-VDC power supply must be provided to the Cable Extension Unit when connecting the Intelligent Compact Camera, or the Lighting Controller.
- *2 The current consumption shows when connecting the Cable Extension Unit to an external power supply.

LCD Monitor

Model	FZ-M08	
Size	8.4 inches	
Туре	Liquid crystal color TFT	
Resolution	1,024 × 768 dots	
Input signal	Analog RGB video input, 1 channel	
Power supply volt-	21.6 to 26.4 VDC	
age	21.0 to 20.4 VBO	
Current	Approx. 0.7 A max.	
consumption	The state of the s	
Ambient	Operating: 0 to 50 °C; Storage: -25 to 65 °C	
temperature range	(with no icing or condensation)	
Ambient	Operating and storage: 35 to 85% (with no condensa-	
humidity range	tion)	
Weight	Approx. 1.2 kg	
Accessories	Instruction Sheet and 4 mounting brackets	

Long-distance Camera Cables

Model	FZ-VS4 (15 m)	FZ-VSL4 (15 m)	
Туре	Standard	Right-angle	
Shock resistiveness (durability)	10 to 150 Hz single amplitude 0.15 mm 3 directions, 8 strokes, 4 times		
Ambient temperature range	Operation and storage: 0 to 65 °C (with no icing or condensation)		
Ambient humidity range	Operation and storage: 40 to 70%RH (with no condensation)		
Ambient atmosphere	No corrosive gases		
Material	Cable sheath, connector: PVC		
Minimum bending radius	78 mm		
Weight	Approx. 1400 g		

Parallel Cable

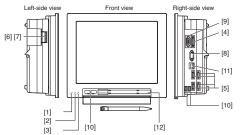

Model	FZ-VP	FZ-VPX	
Vibration	10 to 150 Hz single amp		
resistiveness	3 directions, 8 strokes, 4	times	
Ambient	Operation: 0 to 50 °C; St	orage: -20 to 65 °C	
temperature range	(with no icing or condensation)		
Ambient	Operation and storage: 35 to 85%RH		
humidity range	(with no condensation)		
Ambient atmosphere	No corrosive gases		
Material	Cable sheath: heat-resistant PVC Connector: resin		
Minimum bending radius	75 mm		
Weight	Approx. 160 g	Approx. 180 g	

LED Monitor Cable

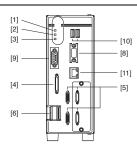

Model	FZ-VM	
Wodel	1 — 1	
Vibration resistiveness	10 to 150 Hz single amplitude 0.15 mm	
	3 directions, 8 strokes, 4 times	
Ambient	Operation: 0 to 50 °C; Storage: -20 to 65 °C	
temperature range	(with no icing or condensation)	
Ambient	Operation and storage: 35 to 85%RH	
humidity range	(with no condensation)	
Ambient atmosphere	No corrosive gases	
Material	Cable sheath: heat-resistant PVC Connector: PVC	
Minimum bending radius	75 mm	
Weight	Approx. 170 g	

Components and Functions

Example of the FZ5 Sensor Controllers LCD-integrated type (4-camera type)

Example of the FZ5-Lite Sensor Controllers LCD-integrated type (4-camera type)

	Name	Description		
[1]	POWER LED	Lit while power is ON.		
[2]	RUN LED	Lit while the controller is in Run Mode.		
[3]	ERROR LED	Lit when an error has occurred.		
[4]	I/O connector (control lines, data lines)	Connect the controller to external devices such as a sync sensor and PLC.		
[5]	Camera connector	Connect cameras.		
[6]	Power	Connect a DC power supply. Wire the power supply unit independently of other devices. After wiring, replace the terminal cover.		
[7]	Ground terminal	Connect the ground wire. Make sure that the controller is grounded with a separate ground wire.		
[8]	Monitor connector (analog RGB)	FZ5-1100 Series/FZ5-600 Series: Cannot connect the monitor. For use this connector, contact OMRON representative. FZ5-1200 Series/FZ5-800 Series/FZ5-L350 Series: Connect monitor.		
[9]	RS-232C/RS-422 connector	Connect an external device such as a personal computer or PLC.		
[10]	USB connector	Connect a track ball, mouse and USB memory. A total of four USB ports are provided and any of the can be used. However, when connecting two or more USB memories, do not connect them to adjace ports. Doing so may cause the USB memories to come into contact, resulting in malfunction or damage.		
[11]	EtherNet connector	Connect the controller to a personal computer.		
[12]	Touch pen (holder)	A touch pen is stored. (Provided with the LCD integrated type only)		

Processing Items

Group	Icon	Processing Item	
		Search	Used to identify the shapes and calculate the position of measurement objects.
	# ##	Flexible Search	Recognizing the shapes of workpieces with variation and detecting their positions.
	← → → → → → → → → → →	Sensitive Search	Search a small difference by dividing the search model in detail, and calculating the correlation.
	b	ECM Search	Used to search the similar part of model form inpur image. Detect the evaluation value and position.
	•	EC Circle Search	Extract circles using "round " shape information and get position, radius and quantity in high preciseness.
	444	Shape Search II	Used to search the similar part of model from inpu image regardless of environmental changes. Detect the evaluation value and position.
	in diameter distribution in the second secon	Shape Search III	Robust detection of positions is possible at high- speed and with high precision incorporating environmental fluctuations, such as dil ferences in individual shapes of the workpieces, pose fluctuations, noise superimposition and shielding.
	0	EC Corner	This processing item measures a corner position (corner) of a workpiece.
	4	Ec Cross	The center position of a crosshair shape is measured using the lines created by the edge information on each side of the crosshair.
	3	Classification	Used when various kinds of products on the assembly line need to be sorted and identified.
	•	Edge Position	Measure position of measurement objects according to the color change in measurement area.
	WU	Edge Pitch	Detect edges by color change in measurement area. Used for calculating number of pins of IC and connectors.
		Scan Edge Position	Measure peak/bottom edge position of workpieces according to the color change in separated measurement area.
	田	Scan Edge Width	Measure max/min/average width of workpieces according to the color change in separated measurement area.
Measurement	Q	Circular Scan Edge Position	Measure center axis, diameter and radius of circular workpieces.
weasarement	Q	Circular Scan Edge Width	Measure center axis, width and thickness of ring workpieces.
		Intersection	Calculate approximate lines from the edge information on two sides of a square workpiece to measure the angle formed at the intersection of the two lines.
	2	Color Data	Used for detecting presence and mixed varieties o products by using color average and deviation.
		Gravity and Area	Used to measure area, center of gravity of workpices by extracting the color to be measured
		Labeling	Used to measure number, area and gravity of workpieces by extracting registered color.
		Label Data	Selecting one region of extracted Labeling, and get tha measurement. Area and Gravity position can be got and judged.
	M	Defect	Used for appearance measurement of plain-color measurement objects such as defects, stains and burrs.
	M	Precise Defect	Check the defect on the object. Parameters for extraction defect can be set precisely.
		Fine Matching	Difference can be detected by overlapping and comparing (matching) registered fine images with input images.
	ABC	Character Inspect	Recognize character according correlation search with model image registered in [Model Dictionary]
	Date 08-02-1	Date Verification	Reading character string is verified with internal date.
	A	Model Dictionary	Register character pattern as dictionary. The pattern is used in [Character Inspection].
		2DCode *2	Recognize 2D code and display where the code quality is poor.
		Barcode *1	Recognize barcode, verify and output decoded characters.
	OCR	OCR	Recognize and read characters in images as character information.
	OCR	OCR User Dictionary	Register dictionary data to use for OCR.
	(A)	Circle Angle	Used for calculating angle of inclination of circular measurement objects.
		Glue Bead Inspection	You can inspect coating of a specified color for gaps or runoffs along the coating path.
Input Image		Camera Image Input	To input images from cameras. And set up the conditions to input images from cameras. (To FZ5 Sensor Controllers only)
pat illaye	哽	Camera Image Input FH	To input images from cameras. And set up the conditions to input images from cameras. (For FH Sensor Control lers only)

Group	Icon		Processing Item
	New York	Camera Image Input HDR	Create high-dynamic range images by acquiring several images with different conditions.
	Lite	Camera Image Input HDRLite	HDR function for FZ-SQ□ Intelligent Compact Cameras.
		Camera Switch	To switch the cameras used for measurement. Not
		Measurement	input images from cameras again. To switch the images used for measurement. Not
Input Image		Image Switching	input images from camera again. The Multi-trigger Imaging processing item captures
	哽哽	Multi-trigger Imaging	multiple images at user-defined timings and executes parallel measurement for each image. Insert the Multi-trigger Imaging to the top of the flow.
	백 년 1년 1년	Multi-trigger Imaging Task	The Multi-trigger Imaging processing item captures multiple images at user-defined timings and executes parallel measurement for each image. Insert this processing item to the top of the processing which requires imaging for multiple times.
		Position Compensation	Used when positions are differed. Correct measurement is performed by correcting position of input images.
		Filtering	Used for processing images input from cameras in order to make them easier to be measured.
	2	Backgrond Suppression	To enhance contrast of images by extracting color in specified brightness.
		Brightness Correct Filter	Track brightness change of entire screen and remove gradual brightness change such as uneven brightness.
		Color Gray Filter	Color image is converted into monochrome images to emphasize specific color.
		Extract Color Filter	Convert color image to color extracted image or binary image.
		Anti Color Shading	To remove the irregular color/pattern by uniformizing max.2 specified colors.
Compensate image		Stripes Removal Filter II	Remove the background pattern of vertical, horizontal and diagonal stripes.
	ABC	Polar Transformation	Rectify the image by polar transformation. Useful for OCR or pattern inspection printed on circle.
	4	Trapezoidal Correction	Rectify the trapezoidal deformed image.
	4/	Machine Simulator	How the alignment marks would move on the image when each stage or robot axis is controlled can be checked.
		Image Subtraction	The registered model image and measurement image are compared and only the different pixels are extracted and converted to an image.
		Advanced filter	Process the images acquired from cameras in order to make them easier to measure. This processing item consolidates existing image conversion filtering into one processing item and adds extra functions.
		Panorama	Combine multiple image to create one big image.
	O ¢	Unit Macro	Advanced arithmetic processing can be easily incorporated into workflow as Unit Macro processing items.
		Unit Calculation Macro	This function is convenient when the user wants to cal- culate a value using an original calculation formula or change the set value or system data of a processing item.
	ABC	Calculation	Used when using the judge results and measured values of Procltem which are registered in processing units.
	+ +	Line Regression	Used for calculating regression line from plural measurement coodinate.
	***	Circle Regression	Used for calculating regression circle from plural measurement coordinate.
		Precise Calibration	Used for calibration corresponding to trapezoidal distortion and lens distortion.
	User	User Data	Used for setting of the data that can be used as common constants and variables in scene group data.
Support	4	Set Unit Data	Used to change the ProcItem data (setting parameters,etc.) that has been set up in a scene.
measurement		Get Unit Data	Used to get one data (measured results, setting parameters,etc.) of ProcItem that has been set up in a scene.
		Set Unit Figure	Used for re-setting the figure data (model, measurement area) registered in an unit.
	-	Get Unit Figure	Used for get the figure data (model, measurement area) registered in an unit.
		Trend Monitor	Used for displaying the information about results on the monitor, facilitating to avoid NG and analyze causes.
		Image Logging	Used for saving the measurement images to the memory and USB memory.
		Image Conversion Logging	Used for saving the measurement images in JPEG and BMP format.
	#	Data Logging	Used for saving the measurement data to the memory and USB memory.
	ఫ్తి	Elapsed Time	Used for calculating the elapsed time since the measurement trigger input.
	区	Wait	Processing is stopped only at the set time. The standby time is set by the unit of [ms].

Group	Icon	Processing Item		
	3	Focus	Focus setting is supported.	
	To the same of the	Iris	Focus and aperture setting is supported.	
	000	Parallelize*3	A part of the measurement flow is divided into two or more tasks and processed in parallel to shorten the measurement time. This processing item is placed at the top of processing to be performed in parallel.	
	P 000	Parallelize Task*3	A part of the measurement flow is divided into two or more tasks and processed in parallel to shorten the measurement time. This processing item is placed immediately before processing to be performed in parallel between Parallelize and Parallelize End.	
		Statistics	Used when you need to calculate an average of multiple measurement results.	
	L	Referrence Calib Data	Calibration data and distortion compensation data held under other processing items can be referenced.	
		Position Data Calculation	The specified position angle is calculated from the measured positions.	
Support measurement	<u>+</u> //	Stage Data	Sets and stores data related to stages.	
	和	Robot Data	Sets and stores data related to robots.	
		Vision Master Calibration	This processing item automatically calculates the entire axis movement amount of the control equipment necessary for calibration.	
	*	PLC Mastoer Calibration	Calibration data is created using a communication command from PLC.	
	ڗ۬	Convert Position Data	The position angle after the specified axis movement is calculated.	
	#/	Movement Single Position	The axis movement that is required to match the measured position angle to the reference position angle is calculated.	
		Movement Multi Points	The axis movements that are required to match the measured position angles to the corresponding reference position angles are calculated.	
	+	Detection Point	Obtains position/angle information by r eferring to the coordinate values measured with the Measurement Processing Unit.	
		Camera Calibration	By setting the camera calibration, the measure- ment result can be converted and output as actual dimensions.	
	40	Data Save	The set data can be saved in the controller main unit or as scene data. The data is held even after the FH/FZ power is turned off.	

Group	Icon	Processing Item		
Branch	皋	Conditional Branch	Used where more than two kinds of products on the production line need to detected separately.	
	\$0	End	This ProcItem must be set up as the last processing unit of a branch.	
	0.00	DI Branch	Same as ProcItem "Branch". But you can change the targets of conditional branching via external inputs.	
	昌一	Control Flow Normal	Set the measurement flow processing into the wait state in which the specific no-protocol command can be executed.	
	量←	Control Flow PLC Link	Set the measurement flow processing into the wait state in which the specific PLC Link command can be executed.	
	昌一	Control Flow Parallel	Set the measurement flow processing into the wait state in which the specific parallel command can be executed.	
	富一	Control Flow Fieldbus	Set the measurement flow processing into the wait state in which the specific Fieldbus command can be executed.	
	SMITCH	Selective Branch	Easily branch to multiple destinations.	
Output result	Ш	Data Output	Used when you need to output data to the external devices such as PLC or PC via serial ports.	
		Parallel Data Output	Used when you need to output data to the external devices such as PLC or PC via parallel ports.	
	% 6	Parallel Judgement Output	Used when you need to output judgement results to the external devices such as PLC or PC via parallel ports.	
		Fieldbus Data Output	Outputs data to an external device, such as a Programmable Controller, through a fieldbus interface.	
Display result	OK	Result Display	Used for displaying the texts or the figures in the camera image.	
		Display Image File	Display selected image file.	
	NG	Display Last NG Image	Display the last NG images.	

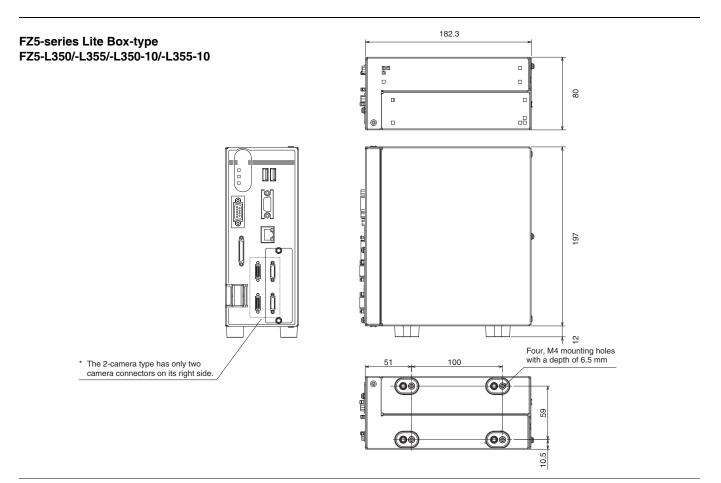

^{*1} Bar Codes that can be read: JAN/EAN/UPC (including add-on codes), Code 39, Codabar (NW-7), ITF (Interleaved 2 of 5), Code 93, Code 128, GS1-128, GS1 DataBar (RSS-14 / RSS Limited / RSS Expanded), Pharmacode
*2 2D Codes that can be read: Data Matrix (ECC200), QR Code
*3 FZ5-L3 - controllers do not support.

Terms and Conditions Agreement

Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranties.

- (a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.
- (b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See http://www.omron.com/global/ or contact your Omron representative for published information.

Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions.

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.

Note: Do not use this document to operate the Unit.
