Manual Cable Tie Installation Tools

Panduit® provides the most preferred hand-operated tools in the industry. These versatile tools can be used for production, maintenance, or construction applications.

Panduit cable tie installation tools promote worker safety, help reduce downtime, improve productivity and provide the lowest total installed cost. As with all Panduit products, quality in design and production along with customer service excellence, are assured.

Tool Highlights:

- **Tool controlled tension and cut-off**
 - Ergonomic tools are durable, lightweight, and easy to use
 - Manual tools
 - Pneumatic tools
- **Installer controlled tension and cut-off**
 - Large selection of tools available for complete range of Panduit cable ties
 - Cost-effective alternative for small volume applications

Automatic Cable Tie Installation Systems

The complete line of Panduit® automatic cable tie installation systems offers a superior solution for high volume harness, assembly, fastening and packaging applications. These ergonomic systems increase productivity, provide consistent performance, and reduce activities that lead to repetitive motion injuries. A variety of tool options provide users with flexible solutions for their unique application needs.

System Highlights

Multiple systems improve productivity, reliability, and versatility:

- Install a cable tie in less than one second
- Multiple cable tie styles and sizes for maximum productivity
- Optional software for advanced system monitoring and performance
- Recommended for annual usage of over 250,000 cable ties/year
- Typical applications: High volume OEM/contract manufacturing

Combined, these innovations improve reliability, maximize productivity, and lower installed costs. As with all Panduit products, quality in design and production along with customer service excellence, are assured.

Note: Recommended for annual usage of over 250,000 cable ties/year. typical applications: high volume OEM/contract manufacturing.

Data Interface Software and Ethernet Enabled Dispenser

Panduit® exclusive Ethernet enabled dispenser and customized data interface software allow production personnel to monitor real-time data in a shop floor environment.

The Ethernet enabled dispenser provides a physical connection between the cable tie installation system and an Industrial Ethernet Network via an RJ45 connection and internal Ethernet card.

- Allows production and/or engineering personnel the capability to measure and track production performance such as job tracking, cycle counts, tool and dispenser serial numbers, and routine maintenance
- Provides the ability to send email notifications for specific system messages
- Data extraction and reporting capabilities on system performance through an exportable electronic log; helps identify operator training needs
- Ability to monitor alerts from remote desktop locations

PAT/Robot Integration Kit

- Used with the PAT1M4.0, PAT1.5M4.0, PAT1M4.0-BT, and PAT1.5M4.0-BT tool heads
- Utilizes the PAT system electronic interface option, PDM-EI, to optimally integrate the PAT system to a robot for a completely automated cable tie installation process
- Significantly reduces labor costs while improving installation quality, reliability, and consistency

PATM4.0-RK

PATM-TT

Part Number	Components	Description	Std. Pkg. Qty.
PATM4.0-RK	Metallic housing	Includes a pneumatic trigger actuator for remote cable tie installation and a mounting bolt pattern to ease PAT tool integration with a robot end effector for a robust and accurate grip.	1
	Transfer hose strain relief kit	Strain relief to maintain transfer hose bend radius reducing tie misfeeds due to sharp hose bend radii during robot motion; also sold separately under part number PATM-RKS (includes two 1-foot strain relief tubes with fastening cable ties).	
	Quick start guides	Provides easily understood electrical, network, and mechanical installation instructions minimizing the robot integrator's design time and simplifying the integration process.	
	Best practices document	List of best practices when integrating the PAT system to a robot optimizing system performance and productivity.	
PATM-TT	Test tool with rubber jaws	This test tool is used during robot cable tie installation programming, providing a safe method to debug robot software without damaging actual PAT tools (test tool is not provided with the PAT/Robot Integration Kit).	1
PATM-RKS	Transfer hose strain relief kit	Strain relief to maintain transfer hose bend radius reducing cable tie misfeeds due to sharp hose bend radii during robot motion; kit is also included on the PATM-RK kit or sold separately (includes two 1-foot strain relief tubes with fastening cable ties).	1

Stainless Steel Cable Ties and Accessories

The Pan-Steel® System provides a strong, durable method of bundling and mechanical fastening, for all indoor, outdoor, and underground (including direct burial) applications. The ties are designed for use in critical applications where strength, vibration, radiation, weathering, corrosion and temperature extremes are a factor.

- **Patented locking head design assures locking in any position, with a high rated loop tensile strength for a durable solution that delivers an extra margin of safety**
- **201, 304, or 316 grade stainless steel provides a strong, long-lasting method of bundling and mechanical fastening in harsh environments**
- **Accessories available to protect, speed, and simplify the mounting of wires, cable, and tubing with Panduit® Pan-Steel® Stainless Steel Cable Ties**
- **Complete line of manual and powered installation tools available with controlled tension and automatic cut-off for lower installed cost**
- **Large selection of stainless steel cable ties to deliver maximum design flexibility to match specific application requirements**

Panduit continues to develop stainless steel solutions for harsh environment applications by solving customer problems with innovative products and reliable tooling to achieve lowest installed cost.

Stainless Installation Tools

GS4MT Hand-Operated Installation Tool

- Single handle operation for fast installation
- Cable tie side entry for immediate positioning of tie and tool
- Controlled tension, fully adjustable
- Easy removal of excess tie

- Qualified product listed per MIL Standard MS90387-3
- Automatically tensions and cuts off tie when predetermined tension is reached
- Installs standard 0.18 inch (4.6mm), light-heavy 0.25 inch (6.4mm) and heavy 0.31 inch (7.9mm) cross section ties

GS4MT

Side Entry

CAMT

Part Number	Part Description	Std. Pkg. Qty.

Tool Tension Locking Kits

- For applications requiring a locking device on either the selector knob (one cross section size and tension only) or tension level adjustment (but allow cross section size changes).

To lock selector knob and tension level.

To lock fine adjustment.

Part Number	Part Description	Std. Pkg. Qty.
TTLK3	Tool tension locking kit for GS4MT and PPTMT installation tools.	1

ST2MT and ST4MT Installation Tool

- Cable tie side entry for immediate positioning of tie and tool
- One hand operation – lightweight
- Easy removal of excess tie
- Tool tension is controlled by installer
- Rugged, lightweight, easy-to-operate pliers-type tool provides mechanical advantage

Part Number	Part Description	Std. Pkg. Qty.
ST2MT	Used with standard, light-heavy, heavy and extra-heavy cross section Pan-Steel® type MLT ties, type MLTC/MLTFC coated ties, wave ties, and type MLTDH double wrapped ties. This tool has twist action cut-off mechanism.	1
ST4MT	Installation tool for use with HTMLT. Manual tensioning controlled by operator. This tool has a built in cutting lever for clean recessed cutoff.	1

RT2HT and RT2HTN Installation Tools

- Cable tie side entry for immediate positioning of tie and tool to speed installation
- Multi-position rear handle provides flexibility for a one or two hand installation
- Narrow nose tool design option available for applications requiring installations in tight confined spaces
- Replacement cutter blade and handle available for RT2HT

RT2HT

RT2HTN

Part Number	Part Description	Std. Pkg. Qty.
RT2HT	Used with extra-heavy, extra-heavy 15, and super-heavy cross section Pan-Steel® type MLT, Wave-Ty™, and MLTFC ties. Width of tool nose 2.60" (66.0mm).	1
RT2HTN	Narrow nose installation tool for use with extra-heavy, extra-heavy 15, and super-heavy cross section Pan-Steel® type MLT and MLTFC ties. Width of tool nose 1.06" (27.0mm).	1

A.
Cable
Ties

HTMT Installation Tool

- Economical
- Coiled tie end remaining after tensioning assures a safe end
- Manual tension, no cut-off
- Installs ties parallel to the bundle

Part Number	Part Description	Std. Pkg. Qty.
HTMT	Used with standard, light-heavy, and heavy cross section Pan-Steel® type MLT ties, type MLTC/MLTFC coated ties, and type MLTDH double wrapped ties.	1

PPTMT Pneumatic Installation Tool

- Power assisted tool for fast and effortless installation
- Cable tie side entry for immediate positioning of tie and tool
- Controlled tension, fully adjustable
- Automatic cut-off
- One hand operation – lightweight
- Easy removal of excess tie
- Operates 85 PSI (586 KPA Bar) non-lubricated air and requires no special maintenance

PPTMT

Part Number	Part Description	Std. Pkg. Qty.
PPTMT	Pneumatic Installation tool for use with the following stainless steel cross section ties: • Type MLT: Standard, light-heavy, and heavy • Type MLTFC: Standard and heavy • Type MLTC and MLTDH: Heavy Used with custom length banding cross sections: • Type MB: Standard and heavy • Type MBC: Heavy Automatically tensions and cuts off tie flush* when predetermined tension is reached, providing more reliable and consistent installations. Ideal for high production applications Installs both standard 0.18 in. (4.4mm) and heavy 0.31 in. (7.9mm) cross section ties with the flip of the knob.	1
PPH10	10.0' (3m) hose assembly (regulator to tool); includes a 0.13" (3.3mm) NPT male connector (to regulator) and 0.13" (3.3mm) female quick disconnect (to tool).	1
PL289N1	Filter/regulator .5 micron element, regulated range 3 – 100 psig, features 0.13" (3.3mm) NPT female output port (to hose PPH10) and 0.25" (6.4mm) male quick disconnect to source air line.	1
KPPTMTG	Replacement gripper kit for PPTMT.	1
KPPTMTB	Replacement blade kit for PPTMT.	1

PBTMT Battery Powered Installation Tool

- Lithium-Ion battery optimizes performance by installing more cable ties per charge
- Ergonomic tool design provides a compact lightweight body, reducing operator fatigue
- Automatic flush cut off enhances productivity with easy one hand installation
- Cable tie side entry allows quick side entry of tie into tool to speed installation
- 360° rotating head allows access to confined spaces
- Controlled tension mechanism provides consistent installations every time
- Battery indicator improves productivity with quick visual identification of battery life
- Variable speed trigger provides increased operator control, for easy installation

PBTMT

Part Number	Part Description	Std. Pkg. Qty.
PBTMT	Battery Powered Installation tool for use with the following stainless steel cross section ties: • Type MLT and MLTFC: Heavy, extra-heavy, and super-heavy • Type MLTC: Heavy • Type MLTDH: Extra-Heavy and super-heavy Used with custom length banding cross sections: • Type MB and MBC: Heavy, extra-heavy, and super-heavy 2 – 12 volt Lithium-Ion batteries and 115 volt, 60 Hz charger included	1

MTRT Retained Tension Manual Installation Tools

- Adjustable detent mechanism provides user pre-set controlled tension for repeatable installations and maximum reliability
- Smooth cable tie cut-off eliminates burrs or sharp edges after installation to deliver added bundle protection and job site safety
- Tie tensioning mechanism provides improved durability compared to conventional gripper style tools
- Change over kits available to allow for installation of all tie cross sections with one tool

Part Number	Part Description	Std. Pkg. Qty.
MTRTH	Retained tension installation tool for use with Pan-Steel® heavy cross section MRT and MRS style ties and MRT double wrapped style ties.	1
MTRTLS	Retained tension installation tool for use with Pan-Steel® light-heavy and standard cross section MRT and MRS style ties and MRT double wrapped style ties.	1
KMTRTH	Change over kits allow for installation of heavy cross section MRT and MRS style ties, and MRT double wrapped style ties in MTRTH tools.	1
KMTRTLS	Change over kits allow for installation of light-heavy and standard cross section MRT and MRS style ties, and MRT double wrapped style ties in MTRTLS tools.	1

BT2HT Hand Operated Installation Tool for Strapping

- Strap side entry
- Multi-position rear handle provides flexibility for a one or two hand installation
- Adjustable tension control
- Easy removal of excess strap
- Installs (3) sizes: 0.38 inch (9.5mm), 0.50 inch (12.7mm), and 0.63 inch (15.9mm)
- Replacement cutter blade and handle available

Part Number	Part Description	Std. Pkg. Qty.
BT2HT	Installation tool for use with 0.38" (9.5mm), 0.50" (12.7mm), and 0.63" (15.9mm) widths of Panduit® Pan-Steel® Strapping. Tensions, cuts strapping, and secures the buckle tab. Lever cut off.	1
KRT2BLD	Replacement cutter blade for RT2HT and BT2HT.	1
KRT2HNDL	Replacement cutter handle for RT2HT and BT2HT.	1

BT75SDT Hand Operated Installation Tool for MS75 Strapping

- Screw drive tension mechanism provides high tension with minimal effort, reducing operator fatigue
- Heavy duty construction offers a longer service life
- Strapping side entry allows quick side entry of the strap into tool to speed installation

Part Number	Part Description	Std. Pkg. Qty.
BT75SDT	Installation tool for use with 0.75" (19.1mm) width strapping only. Tensions and cuts strapping. Screwdriver required for buckle closure (not included).	1

Terminal Crimping Tools

Panduit® offers a wide assortment of tools to provide solutions for installing terminals, disconnects, splices, ferrules and lugs. Panduit installation tools provide quality performance and ease of installation at the lowest installed cost. The long-term reliability of Panduit installation tools provides the highest level of service to meet customer requirements.

- Ergonomic design to minimize operator effort
- Features crimping tools with a controlled cycle mechanism ensuring repeat reliability in every crimp
- Superior locator ensures proper location of the terminal barrel or insulated disconnect in the crimp pocket
- Battery powered, hydraulic tools with fingertip operation are available to meet a variety of installation needs
- UL Listed and CSA Certified tooling/product combinations, as noted

Panduit terminal crimping tools are available in an assortment of styles to meet a variety of installation needs. The installer can control the crimp with the plier type hand operated crimping tool. Hand operated Contour Crimp™ Controlled Cycle Crimping Tools feature ergonomically designed cushioned grips with low handle effort. Panduit terminal crimping tools are designed for use with Panduit terminals, providing the right solution for your termination needs.

Crimping Guidelines for Panduit® Pan-Term® Terminals, Disconnects, Splices and Wire Joints

A.
Cable
Ties

1. Select the proper Panduit terminal for the application and wire size used

- Ring terminals are used for high vibration and grounding applications
- Fork terminals are used for static (non-vibration) applications
- Disconnects are used for applications that require quick connection of wires without the use of tools
- Splices and wire joints are used to join wires together

B.
Stainless
Steel

2. Strip wire to the proper length as specified on:

- Panduit product packaging label
- Packaging instructions included with the Panduit product
- Or if no packaging instructions are available, plan your strip length so that 1/32" of wire can be seen protruding through the tongue end of the terminal barrel

C.
Wiring
Duct

3. Select the proper crimp tool to be used

- Use crimping tools that provide a UL Listed and/or CSA Certified electrical termination, to assure a safe and reliable connection
- Panduit terminals are UL Listed and CSA Certified when crimped with Panduit plier type crimping tool or with the preferred Contour Crimp™ Controlled Cycle Crimping Tool specified on the packaging label

Plier Type
Crimping Tool

Contour Crimp™
Controlled Cycle
Crimping Tool

D.
Terminals
and
Reel
Smart™
System

4. Select the proper crimp pocket for the terminals and wire size you are using

- Panduit crimping tools simplify this process with color-coded crimp pockets. The yellow, blue, and red pockets are specifically designed for the industry standard barrel sizes, each with a specific color code.

E.
Power
Connectors
and
Grounding

5. Perform the electrical crimp for the plier type tool Insulated Terminals and Disconnects

- Locate terminal in appropriate size color-coded crimp die pocket with tool centered on insulation sleeve. (See Note 1, page D.4)
- Rotate terminal so tongue is level with crimp die.
- Insert properly stripped wire into terminal until a minimum of 1/32" of wire extends beyond the terminal barrel.
- Squeeze tool handles firmly to perform the electrical crimp. (See Note 2, page D.4)
- Provide second crimp on the flared portion of the insulation housing to close the insulation as shown. Caution: When using plier type crimping tools, do not squeeze as firmly as you did for the electrical crimp. (See Note 3, page D.4)

Step A

Step B

Steps C and D

Step E

Complete Crimp

Continues on next page

D.2

Crimping Guidelines for Panduit® Pan-Term® Terminals, Disconnects, Splices and Wire Joints (continued)

Non-Insulated Terminals and Disconnects

- Locate terminal in appropriate wire gauge crimp die pocket with indenter centered on barrel seam.
- Rotate terminal so tongue is level with crimp die.
- Insert properly stripped wire (based on recommendations on package label) into terminal until a minimum of 1/32" of wire extends beyond the terminal barrel.
- Squeeze tool handles firmly to perform the electrical crimp. (See Note 2, page D.4)

Step A

Step B

Steps C and D

Complete Crimp

Insulated and Non-Insulated Parallel Splices

- Locate parallel splice in appropriate wire gauge crimp die pocket and position tool on the center of the splice.
- Rotate terminal so tongue is level with crimp die.
- Insert properly stripped wire (based on recommendations on package label) into each end of the parallel splice.
- Squeeze tool handles firmly. (See Note 2, page D.4)
- An insulation crimp is not required on an insulated parallel splice.

Steps A and B

Steps C and D

Complete Crimp

Insulated and Non-Insulated Butt Splices

- Locate butt splice in appropriate color-coded crimp die pocket and position crimp halfway between the wire stop (center of splice) and the end of the insulation crimp area. (See Note 4, page D.4)
- Insert properly stripped wire (based on recommendations on package label) into one end of butt splice.
- Squeeze tool handles firmly to perform the electrical crimp (See Note 2, page D.4)
- Provide second crimp on the flared portion of the insulation housing to close the insulation. Caution: When using plier type crimping tools, do not squeeze as firmly as you did for the electrical crimp. (See Note 3, page D.4)
- Repeat steps 1 – 4 for opposite end of butt splice. (See Note 3, page D.4)

Crimping Guidelines for Panduit® Pan-Term® Terminals, Disconnects, Splices and Wire Joints (continued)

A.
Cable
Ties

Insulated and Non-Insulated Wire Joints

- Properly strip wires per manufacturer's recommendations on product package label.
- Twist stripped wire ends together and insert wires into wire joint.
- Locate wire joint in appropriate wire gauge crimp die pocket and position crimp in the center of the metal insert.
- Squeeze tool handles firmly to perform the electrical crimp. *(See Note 2 below)*

Steps A and B

Steps C and D

Complete Crimp

Note: An insulation crimp is not required on an insulated wire joint.

B.
Stainless
Steel

NOTES for Crimping with the Preferred Hand Operated Controlled Cycle Crimping Tools:

- Panduit controlled cycle crimping tools properly locate rings, forks, and barrel insulated disconnects, pins, and blades. No further positioning is required.
- When using the preferred controlled cycle tool, once a crimp has been started, the ratchet device of controlled cycle tools will not release until the crimp is complete, independent of operator expertise.
- Controlled cycle tools provide the electrical crimp and the insulation closure in a single cycle of the tool.
- When using controlled cycle tooling, insulated butt splices must be inserted from the back of the tool to ensure that the electrical and insulation closure crimp pockets are properly aligned with the splice.

C.
Wiring
Duct

5. Perform the electrical crimp using the preferred controlled cycle tool

- Make sure the terminal barrel is centered correctly in the right die pocket by using the product locator on the backside of the tool.
- Determine the correct die pocket to use based on the color code of the terminal.
- Squeeze the handles of the tool until one click is heard; this click indicates the terminal is now held in place securely to insert the wire.
- Insert the wire and complete cycle to perform the electrical and insulation crimp simultaneously.
- Crimp is complete.

Step A

Step B

Step C

Step D

Complete Crimp

6. Inspect the crimp

Note: If your crimp looks like any of the examples shown below, cut off the terminal and re-crimp. These crimps would provide a poor connection!

Pneumatic Crimping Tool

- Quickly crimps a variety of loose piece terminals in a variety of wire sizes for medium volume production
- Portable – the small size, ease of bench mounting and quick pneumatic connection allow the tool to be moved from one work station to another or to the work itself
- Versatile interchangeable crimping heads let you switch terminal types quickly to meet changing production requirements; this tool, when used with only four crimp heads, can crimp a full range of #26 – 10 AWG insulated and non-insulated terminal products

Part Number	Part Description	Std. Pkg. Qty.
CT-600-A	Pneumatic tool, 6' air hose and carrying case. Does not include crimping heads (ordered separately).	1
CT-500CH	Crimping head for most #22 – 14 insulated terminals, splices, and disconnects.	1
CT-520CH	Crimping head for most #22 – 14 insulated butted seam disconnects and #26 – 22 insulated terminals.	1
CT-550CH	Crimping head for most #22 – 10 insulated terminals and splices.	1
CT-570CH	Crimping head for #22 – 10 non-insulated terminals, splices, and disconnects.	1
PD-600-A	Positioning device (for bench mounting of CT-600-A).	1
FPC-600-A	Foot actuator operating air pressure: 80 – 100 psi 0.233 SCFM type of air: lubricated. Recommend using Norgren (Brand) #FLR222-012-043008 filter lubricator regulator.	1
K600-A	Update kit for foot pedal control and positioning device to work with new CT-600-A pneumatic crimping tool.	1

For proper crimp head selection, see the tooling selection guide for Panduit terminals, splices, and disconnects on pages D.13 – D.15, in this catalog.

Die Type, Manual, Crimping Tool

- High quality, durable tool construction provides long term dependability
- Develops 6 tons of crimping force, crimps copper compression lugs and splices up to 500 kcmil
- Provides UL Listed and CSA Certified connections on Panduit® copper and aluminum lugs, splices insulated terminals

Part Number	Part Description	Std. Pkg. Qty.
CT-720	Manual crimping tool for UL Listed or Recognized and CSA Certified terminations of Panduit® Pan-Lug™ copper compression lugs and splices for #8 AWG – 500 kcmil copper code conductor and aluminum compression lugs and splices for #6 AWG – 350 kcmil copper and aluminum code conductors. Provides UL Listed terminations of Panduit® Pan-Term® #8 – 2 AWG vinyl insulated terminals. Color-coded CD-720 crimping dies, carrying/storage case, and controlled cycle mechanism must be purchased separately. Specifications: Output: 6 tons Weight: 7.7 lbs. Length: 26" Handle span: 58" (open), 2.5" (closed) Warranty: 90 days	1
CC-720	Optional controlled cycle mechanism only. Total weight of tool with CC-720 is 8.25 lbs.	1
C-720	Black steel carrying case for CT-720 crimping tool.	1

For battery powered crimping tools, see compression connector tools selection guide on pages E.3 – E.5.

CD-720 Crimping Dies

- Color-coded for easy matching to color-coding marked on connectors
- Embosses die index number on connector barrels to provide post crimp inspection except CD-720PV8-2
- Part number permanently marked on crimping die for easy identification
- Provides 5-sided crimp results in terminations with premium electrical and mechanical performance

See pages E.3 – E.5 for connector and tool selection information.

CT-2500/L Battery Powered Crimping Tool

- Quick 2-4 second crimping cycle, depending on the cross-section, results in less time to crimp terminals compared to conventional methods
- Lightweight 2.81 lb. (1.28)Kg design provides maximum productivity and ease of use in continuous workflow operations
- Interchangeable crimp heads for termination of all Panduit #22 – 10 AWG terminals, disconnects, and splices
- Crimping force 1.5 Tons (15kN)
- High-performance 10.8 Volt 1.5Ah Lithium-ion battery with high capacity and extremely short charging time ~30 min.
- Electronic controlled and monitoring of operation
- Integrated pressure measurement with visual and audible signals
- Functional evaluation using optical interface and USB-Adapter
- LED for workplace illumination
- Multifunction LED for maintenance display and data transfer via USB adapter
- CE and RoHS compliant

Crimp Tools		
CT-2500/L	Crimps Panduit #22 – 10 AWG insulated and non-insulated Terminals, disconnects, and splices. Includes tool, two battery cartridges (CT-2500/LBC) battery charger (CT-2500/LCHR) and molded carrying case. Crimp heads not included. Meets U.S. Voltage requirements.	1
CT-2500/LE	Crimps Panduit #22 – 10 AWG insulated and non-insulated Terminals, disconnects, and splices. Includes tool, two battery cartridges (CT-2500/LBC) battery charger (CT-2500/LECHR) and molded carrying case. Crimp heads not included. Meets European voltage requirements.	1

Crimp Head Frames		
CT-2550CH	Crimps Panduit #22 – 10 AWG insulated terminals, disconnects, and splices.	1
CT-2525CH	Crimps Panduit #22 – 10 AWG fully insulated disconnects and insulated parallel splices.	1
CT-2570CH	Crimps Panduit #22 – 10 AWG non-insulated terminals, disconnects, and splices.	1
CT-2500CH	Blank Crimp Head for use with CD-525, CD-550 and CD-570 Die Inserts.	1

Die Inserts For Use With CT-2500CH Crimp Head Frame		
CD-525	Die insert used with CT-2500CH (sold separately) to crimp Panduit #22 – 10 AWG fully insulated disconnects and insulated parallel splices.	1
CD-550	Die insert used with CT-2500CH (sold separately) to crimp Panduit #22 – 10 AWG insulated terminals, disconnects, and splices.	1
CD-570	Die insert used with CT-2500CH (sold separately) to crimp Panduit #22 – 10 AWG non-insulated terminals, disconnects, and splices.	1

Accessories		
CT-2500/LCHR	U.S. compatible battery charger for use with the CT-2500/L.	1

CT-2600/L Battery Powered Hydraulic, 4 Ton, Crimping Tool ★ NEW!

- Battery powered hydraulic design delivers quick termination of #8 – 2 AWG large wire insulated and non-insulated ring terminals
- Quick 3-4 second crimping cycle, depending on the cross-section, results in less time to crimp terminals compared to conventional methods
- Compact, portable, and lightweight 5.5 lb. (2.5)Kg design provides maximum productivity and ease of use in continuous workflow operations
- Ram retracts automatically to signal crimp is complete
- Retractable slide button allows ram to retract in mid-cycle for manual adjustment of terminals
- Snap in crimp die provides quick change of Panduit interchangeable crimp dies without the use of tools
- Slim 360° rotations crimp head design allows use in limited space areas
- Crimping force 4.0 Tons (35kN)
- High-performance 18 Volt 2.0Ah Lithium-ion battery with high capacity and extremely short charging time ~15 min.
- Electronic controlled and monitoring of operation
- Integrated pressure measurement with visual and audible signals
- Functional evaluation using optical interface and USB-Adapter
- One-button operation controls all tooling functions
- LED for workplace illumination
- Multifunction LED for maintenance display and data transfer via USB adapter
- CE and RoHS compliant

Crimping Tools

CT-2600/L	Crimps Panduit® tin and nickel plated #8 – 2 AWG high temperature large wire, non-insulated, vinyl and KYNAR** insulated ring terminals. Specifications: Crimping force – 4 tons (35kN) Dimensions: 13.15"L x 2.36"H x 2.95"W – with battery (334mm x 60mm x 75mm) Weight 3.5 lbs. with battery; crimp head not included Crimp cycle time = 3-4 seconds depending on cross-section CT-2600/L includes: Tool with crimp head, two battery cartridges, battery charger and molded carrying case. Crimp dies not included. Crimp die part number listed below. Meets U.S. voltage requirements.	1
CT-2600/LINT	Crimps Panduit tin and nickel plated #8 – 2 AWG high temperature large wire, non-insulated, vinyl and KYNAR insulated ring terminals. Specifications: Crimping force – 4 tons (35kN) Dimensions: 13.15"L x 2.36"H x 2.95"W – with battery (334mm x 60mm x 75mm) Weight 3.5 lbs. with battery; crimp head not included Crimp cycle time = 3-4 seconds depending on cross-section CT-2600/LINT includes: Tool with crimp head, two battery cartridges, battery charger and molded carrying case. Crimp dies not included. Crimp die part number listed below. Meets European voltage requirements.	1

Crimp Die Inserts

CD-2600-P8	Used with CT-2600/L and CT-2600/LINT to install Panduit P8 and P8-HT6 series large wire, high temperature, non-insulated ring terminals.	1
CD-2600-P6	Used with CT-2600/L and CT-2600/LINT to install Panduit P6 and P6-HT6 series large wire, high temperature, non-insulated ring terminals.	1
CD-2600-P4	Used with CT-2600/L and CT-2600/LINT to install Panduit P4 and P4-HT6 series large wire, high temperature, non-insulated ring terminals.	1
CD-2600-P2	Used with CT-2600/L and CT-2600/LINT to install Panduit P2 and P2-HT6 series large wire, high temperature, non-insulated ring terminals.	1
CD-2600-PV8	Used with CT-2600/L and CT-2600/LINT to install Panduit PV8 and PK8 series large wire, vinyl and KYNAR** insulated ring terminals.	1
CD-2600-PV6	Used with CT-2600/L and CT-2600/LINT to install Panduit PV6 and PK6 series large wire, vinyl and KYNAR** insulated ring terminals.	1
CD-2600-PV4	Used with CT-2600/L and CT-2600/LINT to install Panduit PV4 and PK4 series large wire, vinyl and KYNAR** insulated ring terminals.	1
CD-2600-PV2	Used with CT-2600/L and CT-2600/LINT to install Panduit PV2 and PK2 series large wire, vinyl and KYNAR** insulated ring terminals.	1

Accessories

CT-2600/LCHR	U.S. compatible battery charger for use with the CT-2600/L.	1
CT-2600/LINTCHR	European compatible battery charger for use with the CT-2600/LINT.	1
CT-2600/LBC	Rechargeable tool battery for use with the CT-2600/L.	1
CT-2600/LINTBC	Rechargeable tool battery for use with the CT-2600/LINT.	1

Large Ferrule Crimping Dies

Large ferrule crimping dies are designed to snap into the battery powered CT-3001 or CT-3001/E crimping tool to install ferrules onto the stripped ends of #1 AWG to 500 kcmil flexible cables – Classes DLO,H,I,K and M.

- Interchangeable dies allows the use of one power tool for multiple wire sizes
- Snap in mounting delivers less than a 20 second exchange of die sets: no tools needed for additional labor savings
- Dies are made of chrome plated steel to insure up to 50,000 cycles and protection against corrosion
- Impressed die index number provides a quick post crimp inspection of ferrule for superior performance and quality assurance
- 2.9 second cycle time, 26% faster than most comparable tools to deliver quick and quality terminations
- Designed to minimize the profile of the crimped end of wire to assist feeding into the connector wire entries
- Die sets for #1 AWG to 500 kcmil
- 6-ton tool frame of CT-3001 provides sufficient compression of ferrules during crimping to prevent wire pull out and deliver a secure connection

Part Number	Used with Tool*	Wire Size (AWG)	Wire Size (mm ²)	Ferrule Series
CD-2001-F87	CT-3001	1 AWG – 1/0	50.0	F87, FSD87

Semiautomatic Ferrule Crimping Tool – CT-1000

- Innovative rapid load design utilizes continuously molded ferrules to significantly reduce installation time
- Adjustable die setting allows termination of all Panduit #20 – 14 AWG continuously molded ferrules with a single tool
- Controlled cycle tool cuts, strips, and crimps wire to maximize efficiency

Part Number	Part Description	Std. Pkg. Qty.
CT-1000	Controlled cycle crimp tool with trapezoid profile for #20 – 14 AWG (0.50 – 2.5mm ²) insulated continuously molded ferrules on strips. Also cuts and strips wire.	1

B.
Stainless
Steel

Semi-Automatic Ferrule Installer - CP-881

- The automated microprocessor feature provides a quick three step process (wire stripping, ferrule placement, and ferrule crimping) to reduce the average manual processing cycle time from 8 – 10 seconds to 1.5 seconds
- Digital LCD cycle counter display with reset button for batch quantity counting improves accuracy and efficiency
- Color coded die inserts allow visual matching between parts and die sets for fast efficient change over and reduced mismatching
- For use with Panduit® continuously molded #20 – 14 AWG (0.5 – 2.5mm²) DIN ferrules on reels of 1500 – 3000 or mini-reels of 500 – 1000 pieces to deliver a superior solution for quality, high volume terminations.
- Lightweight with built-in handle for easy movement of tool from workstation to workstation for maximum jobsite flexibility and productivity

CP-881

A semi-automated tool that provides a quick three step process (wire stripping, ferrule placement, and ferrule crimping) with a cycle time of 1.5 seconds. This tool is used with Panduit continuously molded #20 – 14 AWG (0.5 – 2.5mm²) DIN ferrules on mini-reels of 500 – 3000 pieces for quality, medium to high volume terminations. Included with the tool are color coded die inserts that allow visual matching between parts and die sets for fast efficient change over and reduced mismatching. The CP-881 tool is lightweight and has a built-in handle for easy movement of tool from workstation to workstation for maximum jobsite flexibility and productivity.

CP-881/E

A semi-automated tool that provides a quick three step process (wire stripping, ferrule placement, and ferrule crimping) with a cycle time of 1.5 seconds. This tool is used with Panduit continuously molded #20 – 14 AWG (0.5 – 2.5mm²) DIN ferrules on mini-reels of 500 – 3000 pieces for quality, medium to high volume terminations. Included with the tool are color coded die inserts that allow visual matching between parts and die sets for fast efficient change over and reduced mismatching. The CP-881 tool is lightweight and has a built-in handle for easy movement of tool from workstation to workstation for maximum jobsite flexibility and productivity.

Reel Smart™ Ferrule Applicator – SCA-712022002 (CA10)

- Designed for use with continuously molded ferrules in reels of 1,500 - 3,000 for high volume applications
- Precision ferrule indexing through applicator for optimum reliability and productivity
- Universal base plate allows compatibility with the UC 200 (CP-871) electric press, and other commercially available bench presses and automatic wire processing (AWP) machines
- Quick change die sets terminate the entire ferrule line to provide fast product change over and reduction in setup time; dies sold separately

Part Number	Part Description	Std. Pkg. Qty.
SCA-712022002 (CA10)	Applicator used to terminate entire line of Reel Smart™ Continuously Molded Ferrules on reels. For use with UC 200 (CP-871) Electric Press and SCA (CD10) series die sets.	1
SCA-712022005WE (CD10-1)	Die insert to be used with the CA10 applicator to terminate FS75, FSD75, FS76 and FSD76 Reel Smart™ Continuously Molded Ferrules.	1
SCA-712022006WE (CD10-2)	Die insert to be used with the CA10 applicator to terminate FS77, FSD77, FS78 and FSD78 Reel Smart™ Continuously Molded Ferrules.	1
SCA-712022007WE (CD10-3)	Die insert to be used with the CA10 applicator to terminate FS80 and FSD80 Reel Smart™ Continuously Molded Ferrules.	1

CA9 Ezair™ and CA-800EZ Applicators

- Designed to terminate all continuously molded terminals, disconnects, and splices in reels of 5,000 for high volume applications
- Precision terminal indexing through applicator for optimum reliability and productivity
- Universal base plate allows compatibility with the UC 200 (CP-871) electric press, and other commercially available bench presses and automatic wire processing (AWP) machines
- Quick change die sets allow for fast product change over and reduction in setup time; dies sold separately

Part Number	Part Description	Std. Pkg. Qty.
CA-800EZ*	Applicator: runs in the AMP* Model T and K bench presses. True “quick change” applicator — no additional plates are necessary. Slide right into the press for easy changeover. Uses CD-800 series die inserts.	1
CA9	CA9 Ezair™ Applicator: terminates the entire Reel Smart™ product line. This greatly reduces set up and maintenance time and increases productivity. This patented applicator is so smart it automatically adjusts feed stroke to the correct pitch and length for the entire product line. Crimp die changeover in less than 1 minute, minimizes downtime and increases productivity. Fast, easy loading of terminal parts without special instructions or setup personnel. Simply feed the parts strip into the applicator. All the necessary adjustments are made by the dies and the automatic feed stroke. Used in UC 200 (CP-871) electric press. Safety lockout guard ensures operator safety. Positive stop adjustment rings allow for electrical and insulation crimp adjustments as desired.	1

Electric Bench Press

- For use with Panduit® Applicators and Reel Smart™ Continuously Molded Terminals and Ferrules to provide a superior solution for quality, high volume terminations
- UC 200 (CP-871) press has a microprocessor based controller and LCD that displays text messages and cycle count with multi-language capability
- Tool crimp height adjustment feature allows user to easily set and maintain desired crimp height for consistent performance
- Applicator can be changed without the use of tools to facilitate faster changeover for lower cost of ownership

Part Number	Part Description	Std. Pkg. Qty.
UC 200 (CP-871)	Electric press: 4000+ terminations per hour. Operates on 110 VAC current/60 Hz, 220 VAC current/50 Hz (field convertible). Overall size (without reel): 13" x 33" x 16". Total weight (without reel): 176 lbs. Includes foot pedal.	1

TA13721A01 = 60/40 Solder Slug with 1/8" (0.125) outer diameter.

TA13722A01 = 60/40 Solder Slug with 3/16" (0.188) outer diameter.

(1) Insulation Support: Minimum wire insulation strain relief for normal applications.

Plastic and DiscoGrip™ Insulation Crimp: Secondary wire insulation strain relief for high vibration or conductor strain applications.

Metal Insulation Grip: Maximum wire insulation strain relief for high vibration or conductor strain applications.

***Modified lower die for barrel insulated disconnects DV-B series. Available as a complete die set or just lower die assembly.

Applicable Pan-Term® products meet or exceed the following test specifications:

- UL 486A (Terminals)
- UL 486C (Splices)
- UL 310 (Blade Adapters)
- CSA C22.2 No. 65 (all designs)
- UL and CSA approved products are shown with the applicable logos in the product section.
- UL file #E52164, CSA File #LR31212

Applicable Reel Smart™ products meet or exceed the following test specifications:

- Listed per Underwriters Laboratories, Inc. Standard UL 310 (Disconnects)
- Recognized under the Component Recognition Program of Underwriters Laboratories Inc.
- Certified by Canadian Standards Association (Disconnects)
- UL and CSA listed products are shown with the applicable logos in the product section.
- UL file #E78526, CSA file #LR31212

Applicable Panduit® ferrules meet or exceed the following test specifications:

- UL 486F
- CSA-C22.2 No. 291-14.
- DIN color code
- UL and CSA listed products are shown with the applicable logos in the product section.
- UL file #E472545, CSA file #LR31212

Compression Connector Crimping Tools

Panduit® offers a wide range of tools to provide solutions for installing compression lugs and splices. Panduit installation tools provide quality performance, ease of installation, and lowest installed cost. The long-term reliability of Panduit installation tools provides the highest level of service to meet and surpass customer requirements.

- Ergonomic design to minimize operator effort
- Controlled cycle mechanisms ensuring reliability and repeatability in every crimp made
- Crimping dies are color coded to easily match the compression connector to the proper die
- UL Listed and CSA Certified terminations with Panduit compression connectors, as noted

Panduit compression connector crimping tools are available in an assortment of styles including manually operated mechanical and hydraulic, battery operated hydraulic, and AC powered hydraulic to meet a variety of installation needs. Uni-Die™ Dieless Crimping Tools crimp a variety of sizes and eliminate the need to purchase crimping dies. Fully self-contained, Lithium-Ion battery powered crimping tools provide the ease of push button crimping with up to 35% more crimps per battery charge and up to a 30% faster crimp cycle time than comparable tools with NiCd or NiMH batteries.

Crimping Guidelines for Panduit® Pan-Lug™ Compression Lugs and Splices

A.
Cable
Ties

1. Select the proper Panduit compression connector for the conductor type and size being used.

- Panduit compression connectors are identified with the proper conductor size and conductor type marked on the tongue or barrel of the connector

- The proper conductor size and type to be used with each connector can also be found in the installation instructions included with Panduit product packaging and in the tool charts* in this catalog

Tool Chart for Compress Types LCB, LCC and SCL

PANDUIT PART NUMBER	STUD WIRE SIZE	WIRE RANGE (AWG) WITH (IN-CH) (STR AWG)	WIRE STRIP LENGTH (IN.)	CT#/TOL
LCB, LCC SCL	8 AWG	---	3/4	RED P21 (3)
LCB, LCC SCL	8 AWG	---	1-1/4	BLUE P24 (3)
LCB, LCC SCL	2 AWG SOL 63 AWG STR	4 AWG	1-1/8	GRAY P28 (3)
LCC, LCC SCL	2 AWG	6-2 AWG	1-1/4	BROWN P33 (3)
LCB, LCC SCL	1 AWG	6-1 AWG	1-7/16	GREEN P37 (3)
LCB, LCC SCL	1/0 AWG	6-1/0 AWG	1-1/2	---
LCB, LCC SCL	2/0 AWG	6-2/0 AWG	1-5/8	---
LCB, LCC SCL	3/0 AWG	6-3/0 AWG	1-1/2	---
LCB, LCC SCL	3/0 AWG	6-3/0 AWG	1-5/8	---

2. Strip the conductor to the proper strip length. As specified:

- On the Panduit product packaging label or
- On the installation instructions included with Panduit product packaging or
- In the tool charts* in this catalog

Make sure the conductor is not stripped too long, which would result in exposed wire between the barrel of the connector and the cable insulation.

Make sure the conductor is not stripped too short, which would result in a less than complete contact area with the connector when the conductor is inserted in the barrel.

Do not nick or cut strands of conductor during crimping, which would result in a less than premium conductor termination.

Make sure conductor strands are free from corrosion.

B.
Stainless
Steel

3. Select the proper crimping die and crimping tool to be used with the connector.

Use crimping tools and dies that provide a UL Listed and/or CSA Certified electrical termination, to assure a safe and reliable connection.

Many Panduit compression connectors are UL Listed and CSA Certified when crimped with Panduit and specified competitor crimping tools and dies. These tools and dies are listed in the tool charts* in this catalog. Panduit crimping tools and dies to be used with each connector are also listed on the installation instructions included with Panduit product packaging.

Panduit compression connectors are color-coded and marked with Panduit and specified competitor die index numbers. Select the proper crimping die to be used by matching the color code and die index number marked on the connector to the same markings on the crimping die.

4. Crimp the connector.

Insert the conductor into the barrel of the connector. The conductor should stop against the end of the barrel of the lug, or wire stop in the butt splice, upon complete insertion of the conductor in the barrel. Some lugs are offered with inspection windows that provide visual inspection of the complete conductor insertion.

Review the installation instructions included with the Panduit product packaging or the tool charts* for the proper number of crimps to be placed in the connector. Make the first crimp in the barrel nearest the tongue of the lug, or wire stop in a butt splice, and make successive crimps in the

barrel working towards the conductor entry at the end of the barrel. Use the color-coded or knurled

Identify

connector to evenly space the placement of the crimps in the barrel.

When properly crimped, the die index number engraved in the crimping die will be embossed into the barrel of the connector. The crimp should be placed in the connector so the die index number can be easily read when the connector is installed.

Contour Crimp™ Controlled Cycle Tools

A.
Cable
Ties

- Controlled cycle mechanism assures high quality, consistent terminations
- Ergonomic tool design assures operator comfort, safety, and performance
- Polypropylene handles provide chemical resistance and a cushioned, non-slip grip

CT-1700

CT-1701

Part Number	Part Description	Std. Pkg. Qty.
CT-1700	Crimps Panduit #8 – 2 AWG non-insulated tubular terminals (S series), #8 – 1 AWG copper code conductor lugs and splices, #8 – 2 AWG copper flex conductor lugs, #6 – 4 AWG dual rated aluminum lugs and splices and CTAPF10-16 to CTAPF3-12 copper taps. Includes 5-position, color coded rotating die.	1
CT-1701	Crimps Panduit #10 – 2 AWG non-insulated large gauge ring terminals (P series), #12 – 4 AWG non-insulated heavy duty ring terminals (P series), and #14 – 10 AWG copper code conductor lugs. Includes 5-position, rotating die.	1

Cable Stripping Tool for Large Cable Sizes

- Provides safe and easy stripping of cable insulation for cables 3/16" to 1 9/16" diameter
- Cutting blade provides circular, spiral, and in-line insulation cutting
- Spiral cut mode, tough/hard insulations peel off easily
- In-line cut mode for use with softer insulation like neoprene
- Unique blade profile for long life, low friction stripping of difficult insulations like rubber and silicon
- Cutting blade easily adjusts to proper height to cut insulation without nicking conductor strands
- Ergonomic shape for safe comfortable use
- Compact design
- Easy-fit replacement blade, one spare blade included with tool

Part Number	Wire Range (O.D.)	Part Description	Std. Pkg. Qty.
CST114-157	0.18" – 1.57"	Cable stripping tool for stripping insulation from cables 3/16" to 1 9/16" diameter. Includes replacement cutting blade. Warranty: 90 days	1

Cable Cutting Tools

- Designed with optimal force transmission ratio and stepwise cutting to allow for one-hand operation
- Ergonomically formed, soft handle grips provide easy operation without fatigue
- All parts made of high-tempered special steel; blades and stressed parts are specially tempered or hardened for long term durability
- Not for use with steel and ASCR cable

CCT-500

CCT-320

Part Number	Part Description	Std. Pkg. Qty.
CCT-500	Ratchet cable cutting tool cuts both copper and aluminum solid code and stranded flex cables (AL & CU cable to 1000MCM) up to 2 -1/32" (52mm) diameter. Approximate dimensions 14" (356mm) x 5-1/2" (140mm) x 1" (25.4mm). Tool weight 29.6 oz. (840 g). Warranty: 1 year.	1
CCT-320	Ratchet cable cutting tool cuts both copper and aluminum solid code cables (AL cable to 600MCM and CU cable to 500MCM) from 1/4" (6mm) to 1" (25mm) and stranded flex cables from 1/4" (6mm) to 1-1/4" (32mm) diameter. Approximate dimensions 10" (254mm) x 3-3/4" (95mm) x 1" (25.4mm). Tool weight 21 oz. (600 g). Warranty: 1 year.	1

Die Type, Manual Hydraulic, 14 Ton, Crimping Tool

- Develops 14 tons of crimping force, crimps copper compression lugs and splices up to 750 kcmil
- Two-stage rapid advance hydraulic system minimizes number of pumps required to complete a crimp, saves time
- High quality, durable tool construction provides long-term dependability
- Cushioned grip prevents hands from slipping on tool, reduces fatigue
- Provides UL Listed and CSA Certified connections on Panduit® Pan-Lug™ Copper and Aluminum Lugs and Splices and Copper Taps
- Open “C-Head” design allows easy loading of crimping dies and connectors, saves time
- Uses color-coded crimping dies to provide easy matching of crimping die to connector
- Embosses die index number on connector barrels to provide post crimp inspection
- Dies installed using spring loaded die retention pins, no need for tools
- Rubber boot on crimp head provides abrasion protection
- Audible “pop-off” valve indicates crimp completion
- Crimp head rotates 180 degrees, provides versatility for use in restricted spaces

Die Type, Lithium-Ion Powered Hydraulic, 6 Ton, In-Line Crimping Tool

A.
Cable
Ties

- Lithium-Ion battery powered, provides fingertip operation and up to 90% more crimps per battery charge than tools powered with NiCd or NiMH batteries
- In-line tool design with low profile, 180° rotating, enclosed crimp head design for reaching into tight spaces
- Lightweight and ergonomically balanced for easy operation without fatigue, weighs 7.15 lbs. with battery
- Self-contained unit, completely portable
- Develops 6 tons of crimping force, up to 389 crimps per battery charge using Panduit 500 kcmil copper lugs and splices
- Provides UL Listed and CSA Certified connections on Panduit copper lugs, splices and taps
- Audible “pop-off” valve indicates crimp completion
- Tool provided with two 14.4 VDC Lithium-Ion rechargeable batteries, battery charger, wrist strap and tool bag
- Batteries incorporate LED fuel gage so battery charge level can be checked to allow for continuous operation
- Approximately 2.9 second crimp cycle time provides quick terminations, 26% faster than tools with NiCd or NiMH batteries
- Battery charger charges expended batteries completely in 60 minutes
- Compatible with CD-2001 color-coded crimping dies to provide easy matching of crimping die to connector
- Embosses die index number on connector barrels to provide post crimp inspection
- Dies installed using spring loaded die retention pins, no need for tools

- Develops 14 tons of crimping force when used with 10,000 psi hydraulic pump and hose, crimps copper compression lugs and splices up to 750 kcmil
- Incorporates Parker type quick-connect fittings to ease installation and save time
- High quality, durable tool construction provides long-term dependability
- Provides UL Listed and CSA Certified connections on Panduit® Pan-Lug™ Copper and Aluminum Lugs and Splices and Copper Taps
- Open “C-Head” design allows easy loading of crimping dies and connectors, saves time
- Uses color-coded crimping dies to provide easy matching of crimping die to connector
- Embosses die index number on connector barrels for post crimp inspection
- Dies installed using spring loaded die retention pins, no need for tools
- Cast in handle allows crimp head to be mounted in a bench vice

Uni-Die™ Dieless, Manual Hydraulic, 6.2 Ton, Crimping Tool

- Dieless crimping tool design eliminates purchase or lost crimping dies, saves cost
- Develops 6.2 tons of crimping force with four point indenter system, crimps copper compression lugs and splices up to 750 kcmil
- Two-stage rapid advance hydraulic system minimizes number of pumps required to complete a crimp
- High quality, durable tool construction provides long-term dependability
- Cushioned grips prevent hands from slipping on tool, reduces fatigue
- Incorporates aluminum crimp head and fiberglass handles, results in lightweight tool and ease of operation
- Provides UL Listed and CSA Certified connections on Panduit® Pan-Lug™ Copper Lugs and Splices
- Provides UL Listed and CSA Certified wire range-taking capability on Panduit® Pan-Lug™ Copper Lugs and Splices, minimizes connector inventory and saves cost
- Flip-top crimp head design allows easy loading of connectors, saves time
- Audible “pop-off” valve indicates crimp completion
- Crimp head rotates 360 degrees, provides versatility for use in restricted spaces

Uni-Die™ Dieless, Lithium-Ion Powered Hydraulic, 6.2 Ton, Crimping Tool

A.
Cable
Ties

- Lithium-Ion battery powered, provides fingertip operation and up to 135% more crimps per battery charge than tools powered with NiCd or NiMH batteries
- Dieless crimping tool design eliminates the cost of crimping dies
- Provides wire range-taking capability with Panduit copper compression connectors, allows use of a minimum of lug sizes to crimp a wide range of wire sizes
- Aluminum alloy flip-top crimp head allows easy loading of connectors and rotates 360°
- Ergonomically balanced and lightweight for easy operation without fatigue, weighs 11.75 lbs. with battery
- Self-contained unit, completely portable
- Develops 6.2 tons of crimping force, crimps copper compression lugs and splices up to 750 kcmil, up to 183 crimps per battery charge when crimping Panduit 500 kcmil copper lugs

- Provides UL Listed and CSA Certified connections on Panduit copper lugs and splices
- Audible “pop-off” valve indicates crimp completion
- Tool provided with two high capacity Lithium-Ion 14.4 VDC rechargeable batteries, battery charger, shoulder strap, and tool bag
- Batteries incorporate LED fuel gage so battery charge level can be checked to allow for continuous operation
- Approximately 3.5 second crimp cycle time provides quick terminations, 25% faster than tools using NiCd or NiMH batteries
- Battery charger charges expended batteries completely in 60 minutes

- Provides UL Listed and CSA Certified wire range-taking capability on Panduit® Pan-Lug™ Copper Lugs and Splices, minimizes connector inventory and saves cost
- Flip-top crimp head design allows easy loading of splices, saves time

Part Number	Part Description	Std. Pkg. Qty.
CT-980CH	<p>Remote hydraulic Uni-Die™ dieless crimp head provides UL Listed or Recognized and CSA Certified terminations of Panduit® Pan-Lug™ Copper Compression Lugs and Splices for #4 AWG – 750 kcmil copper code conductor.</p> <p>Use with Panduit CT-901HP hydraulic pump and CT-900HPH 10' hydraulic hose.*</p> <p>Specifications: Output: 6.2 tons Jaw opening: 1.46" Weight: 6.5 lbs. Length: 10.5" Height: 5.3" Width: 2.5" Warranty: 1 year</p> <p>CT-980CH includes: • Tool • Steel tool case • Supplied with female Parker type quick-connect fitting assembled to tool</p>	1

*CT-902RCH remote control handle available, offering one hand operation of crimp head with CT-902HP hydraulic pump and CT-900HPH hose, sold separately, see page E.16. CG-980 crimp force measurement gauge available, sold separately, see page E.24.

- Provide easy visual reading of output force for hydraulic crimping tools
- Easy-to-read crimp force tolerance zone for applicable tools marked on gauge
- Factory calibrated to provide accuracy and quality assurance control of crimping tools in the field
- Blank dies for fixture supplied with test gauge for easy mounting and operation of gauge with crimping tool

①The CT-1700 crimp die pockets are integrated into the tool frame.
 ③CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA adapter.
 ④CD-940 dies to be used exclusively with CT-940CH and CT-2940 tools.
 ②Does not include Class M flex conductor with Thomas and Betts tools.
