1. SCOPE OF THIS DOCUMENT

This product specification applies to Panasonic's, Class 2, Bluetooth®¹ low energy single mode module, series number: PAN1720 (CC2540 from Texas Instruments) and PAN1721 (CC2541 from Texas Instruments).

2. DIFFERENCE PAN1720 / PAN1721

Both the PAN1720 and PAN1721 are referred to as the PAN172x in this document.

The PAN1721 is pin-compatible with the PAN1720, with the exception that USB is the hardware communication interface on the PAN1720 and I2C is the hardware communication interface on the PAN1720. Compared to the PAN1720, the PAN1721 provides lower RF current consumption. The PAN1721 does not have the USB interface found on the PAN1720, and provides lower maximum output power in TX mode.

Additional details , which have an impact on the module can be found in the datasheets from Texas Instruments.

CC2540 from Texas Instruments

CC2541 from Texas Instruments

Both ICs the CC2540 as well as the CC2541 come with an internal 256 KB flash memory.

3. DIFFERENCE PAN172X / PAN171X

The PAN171x are the non antenna version where the PAN172x are the versions with antenna.

4. KEY FEATURES

- Bluetooth Low Energy Single Mode 4.0
- Surface mount type 15.6 x 8.7 x 1.8 mm³
- Up to 4.0 dBm Tx power (typical) with transmit power control
- CC2541 has typically 0dBm Tx power
- High sensitivity (-94 dBm typ.)
- Texas Instrument's CC2540/CC2541 Single Chip BLE Solution inside
- High performance low power 8051 Microcontroller core
- No external components needed
- Fast Connection Setup
- Internal crystal oscillator (32MHz)
- Internal 32khz crystal oscillator for Sleep Timer
- Two powerful USARTs
- USB or I2C interface
- Powerful five channel DMA

¹ Bluetooth is a registered trademark of the Bluetooth Special Interest Group.

5. BLUETOOTH LOW ENERGY

Bluetooth Low Energy (BLE), part of Bluetooth Ver. 4.0, specifies two types of implementation: Single mode and dual mode. Single mode devices implement the low energy specification and consume just a fraction of the power of classic Bluetooth, allowing the short-range wireless standard to extend to coin cell battery applications for the first time. Dual mode devices combine low energy with the power of classic Bluetooth and are likely to become a de facto feature in almost all new Bluetooth enabled cellular phones and computers.

Single mode Bluetooth 4.0 Low Energy is not backwards compatible with previous Bluetooth standards. Dual mode Bluetooth 4.0 Low Energy is backwards compatible and well suited for gateway applications, but is not practical for low power devices.

6. APPLICATIONS FOR THE MODULE

All Embedded Wireless Applications

- Access Points
- Industrial Control
- Medical
- Scanners
- Wireless Sensors
- Low Power

- Proximity
- Smart Phone
- Access Points
- Temperature
- Wellness
- Sports

7. DESCRIPTION FOR THE MODULE

The PAN172x is a short-range, Class 2, BLE single mode module for implementing Bluetooth functionality into various electronic devices. A block diagram can be found in chapter 10.

The PAN172x is a cost-effective, low-power, true system-on-chip (SoC) for Bluetooth low energy applications. It enables robust BLE master or slave nodes to be built with very low total bill-of-material costs. The PAN172x combines an excellent RF transceiver with an industry-standard enhanced 8051 MCU, insystem programmable flash memory, 8-KB RAM, and many other powerful supporting features and peripherals. The PAN172x is suitable for systems where very low power consumption is required. Very low-power sleep modes are available. Short transition times between operating modes further enable low power consumption.

Panasonic offers Bluetooth low energy protocol stacks and applications from Texas Instruments and BlueRadios. The Bluetooth low energy protocol stack from Texas Instruments, is a flexible and cost-effective single-mode Bluetooth low energy solution.

The BlueRadios stack enables rapid and low cost development using an AT command set without the need for a complier. Additional advantages include UART programming, over-the-air-updates, easy integration "C" library framework, serial streaming of data, and smart phone libraries and applications.

9. BLUETOOTH FEATURES

- Bluetooth 4.0 single mode low energy technology.
- Class 2 TX power w/o external PA, improving link robustness.
- Excellent link budget (up to 96 dB), enabling long-range applications.
- Accurate digital received signal-strength indicator (RSSI)
- Integrates the new low power profiles and services
- Embedded BT-Stack available

11. TEST CONDITIONS

Measurements shall be made under operating free-air temperature range unless otherwise specified.

25 ± 10°C Temperature Humidity 40 to 85%RH
Supply Voltage 3.3V

12. GENERAL DEVICE REQUIREMENTS AND OPERATION

All specifications are over temperature and process, unless indicated otherwise.

12.1. ABSOLUTE MAXIMUM RATINGS

No	See ²		Value	Unit
Rati	ngs Over Operatir	ng Free-Air Temperature Range		
1	Supply voltage	All supply pins must have the same voltage	-0.3 to 3.9	V
2	Voltage on any o	ligital pin	-0.3 to VDD+0.3 <3,9	V
3	Operating ambie	nt temperature range	-40 to 85	°C
4	Storage tempera	ture range	-40 to 125	°C
5	Bluetooth RF inputs		10	dBm
6		ng to human-body model, JEDEC STD 22, method A114 irged-device model, JEDEC STD 22, method C101	1000 500	V

12.2. RECOMMENDED OPERATING CONDITIONS

No	Rating	Min	Max	Unit
1	Power supply voltage	2	3.6	٧
2	Maximum ambient operating temperature	-40	85	°C

² Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolutemaximum-rated conditions for extended periods may affect device reliability.

12.3. PAN1720 CURRENT CONSUMPTION

The current consumption is dependant on the user scenario and the setup and timing in the low power modes. The total power consumption can be optimized by adjusting the scan windows and intervals.

Please refer for the latest information for different power modes to the chapter "Electrical Characteristics" in Texas Instruments datasheet, refer to [2]. As indication below are typical values from CC2540 datasheet.

For PAN1721 refer to CC2541 datasheet.

ELECTRICAL CHARACTERISTICS

Measured on Texas Instruments CC2540 EM reference design with T_A = 25°C and VDD = 3 V

	PARAMETER	TEST CONDITIONS	MIN	TYP	MAX	UNIT
		Power mode 1. Digital regulator on; 16-MHz RCOSC and 32-MHz crystal oscillator off; 32.768-kHz XOSC, POR, BOD and sleep timer active; RAM and register retention		235		
I _{core}	Core current consumption	Power mode 2. Digital regulator off; 16-MHz RCOSC and 32-MHz crystal oscillator off; 32.768-kHz XOSC, POR, and sleep timer active; RAM and register retention		0.9		μА
		Power mode 3. Digital regulator off; no clocks; POR active; RAM and register retention		0.4		
	Low MCU activity: 32-MHz XOSC running. No rac peripherals. No flash access, no RAM access.	Low MCU activity: 32-MHz XOSC running. No radio or peripherals. No flash access, no RAM access.		6.7		mA
		Timer 1. Timer running, 32-MHz XOSC used		90		μA
		Timer 2. Timer running, 32-MHz XOSC used		90		μA
١,	Peripheral current consumption	Timer 3. Timer running, 32-MHz XOSC used		60		μA
peri	(Adds to core current I _{core} for each peripheral unit activated)	Timer 4. Timer running, 32-MHz XOSC used		70		μA
		Sleep timer, including 32.753-kHz RCOSC		0.6	·	μA
		ADC, when converting		1.2		mA

GENERAL CHARACTERISTICS

Measured on Texas Instruments CC2540 EM reference design with T_A = 25°C and VDD = 3 V

PARAMETER	TEST CONDITIONS	MIN	TYP	MAX	UNIT		
WAKE-UP AND TIMING							
Power mode 1 → Active	Digital regulator on, 16-MHz RCOSC and 32-MHz crystal oscillator off. Start-up of 16-MHz RCOSC		4		μs		
Power mode 2 or 3 → Active	Digital regulator off, 16-MHz RCOSC and 32-MHz crystal oscillator off. Start-up of regulator and 16-MHz RCOSC		120		μs		
Active → TX or RX	Crystal ESR = 16 Ω . Initially running on 16-MHz RCOSC, with 32-MHz XOSC OFF		410		μs		
	With 32-MHz XOSC initially on		160		μs		
RX/TX turnaround			150		μs

19. CASE MARKING

No.	Remark
1	Marking for Pin 1 (Circle 0,15 mm)
2	2D-Code, for internal usage only and can be change without any notice
3	Marking definition see below

19.1. EXAMPLE FOR MARKING

Р	Α	N	1	7	2	0			Ξ	W	/	S	W		
Е	Z	W	8	9	8	2	0	Α	Х	K	F				
Y	Υ	W	W	D	L	L									
F	C	С		D	•		Т	7	٧	Р	Α	Ν	1	7	

19.2. MARKING DEFINITION

- (1) Pin1 marking
- (2) 2D code (Serial number)
- (3) Marking:
 - PAN17xx (Model Name), HW/SW (Hardware/Software version)
 - ENW89820AxKF (Part Number, refer to chapter 25 Ordering Information)
 - Lot code (YearYear, WeekWeek, Day, LotLot)
 - ES (Engineering Sample marking)

Note: For available Software Versions, refer to [1] PAN172xETU Design-Guide. and chapter 25 Ordering Information.

20. MECHANICAL REQUIREMENTS

No.	Item	Limit	Condition
1	Solderability	More than 75% of the soldering area shall be coated by solder	Reflow soldering with recommendable temperature profile
2	Resistance to soldering heat	It shall be satisfied electrical requirements and not be mechanical damage	See chapter 14.2

CLASSIFICATION	PRODUCT SPECII	FICATION	No. DS-17xx-2400-	102	REV. 1.9

21. DEVELOPMENT OF APPLICATIONS

For development support please refer to [1] PAN172xETU Design-Guide.

22. RELIABILITY TESTS

The measurement should be done after being exposed to room temperature and humidity for 1 hour.

No.	Item	Limit	Condition
1	Vibration test	Electrical parameter should be in specification	a) Freq.:10~50Hz,Amplitude:1.5mm a) 20min. / cycle,1hrs. each of XYZ axis b) Freq.:30~100Hz, 6G b) 20min. / cycle,1hrs. each of XYZ axis
2	Shock test	the same as above	Dropped onto hard wood from height of 50cm for 3 times
3	Heat cycle test	the same as above	-40°C for 30min. and +85°C for 30min.; each temperature 300 cycles
4	Moisture test	the same as above	+60°C, 90% RH, 300h
5	Low temp. test	the same as above	-40°C, 300h
6	High temp. test	the same as above	+85°C, 300h

23. CAUTIONS

Failure to follow the guidelines set forth in this document may result in degrading of the product's functions and damage to the product.

23.1. DESIGN NOTES

- (1) Follow the conditions written in this specification, especially the control signals of this module.
- (2) The supply voltage has to be free of AC ripple voltage (for example from a battery or a low noise regulator output). For noisy supply voltages, provide a decoupling circuit (for example a ferrite in series connection and a bypass capacitor to ground of at least 47uF directly at the module).
- (3) This product should not be mechanically stressed when installed.
- (4) Keep this product away from heat. Heat is the major cause of decreasing the life of these products.
- (5) Avoid assembly and use of the target equipment in conditions where the products' temperature may exceed the maximum tolerance.
- (6) The supply voltage should not be exceedingly high or reversed. It should not carry noise and/or spikes.
- (7) Keep this product away from other high frequency circuits.

CLASSIFICATION	PROD	DUCT SPECIFICATION	No. DS-17xx-2400-	·102	REV. 1.9
SUBJECT		TOOTH LOW ENERGY MODE MODULE	PAGE	21 of	35
CUSTOMER'S COD PAN172x / PAN171x	1	NASONIC'S CODE W89820AxKF / ENW89835AxKF	DATE	05.08.20)13

23.2. INSTALLATION NOTES

- (1) Reflow soldering is possible twice based on the conditions in chapter 15. Set up the temperature at the soldering portion of this product according to this reflow profile.
- (2) Carefully position the products so that their heat will not burn into printed circuit boards or affect the other components that are susceptible to heat.
- (3) Carefully locate these products so that their temperatures will not increase due to the effects of heat generated by neighboring components.
- (4) If a vinyl-covered wire comes into contact with the products, then the cover will melt and generate toxic gas, damaging the insulation. Never allow contact between the cover and these products to occur.
- (5) This product should not be mechanically stressed or vibrated when reflowed.
- (6) To repair the board by hand soldering, follow the conditions set forth in this chapter.
- (7) Do not wash this product.
- (8) Refer to the recommended pattern when designing a board.
- (9) Pressing on parts of the metal cover or fastening objects to the metal will cause damage to the unit.
- (10) For more details on LGA (Land Grid Arrey) soldering processes refer to the application note.

23.3. USAGE CONDITIONS NOTES

- (1) Take measures to protect the unit against static electricity.

 If pulses or other transient loads (a large load applied in a short time) are applied to the products, check and evaluate their operation befor assembly on the final products.
- (2) Do not use dropped products.
- (3) Do not touch, damage or soil the pins.
- (4) Follow the recommended condition ratings about the power supply applied to this product.
- (5) Electrode peeling strength: Do not add pressure of more than 4.9N when soldered on PCB.
- (6) Pressing on parts of the metal cover or fastening objects to the metal cover will cause damage.
- (7) These products are intended for general purpose and standard use in general electronic equipment, such as home appliances, office equipment, information and communication equipment.

23.4. STORAGE NOTES

- (1) The module should not be stressed mechanically during storage.
- (2) Do not store these products in the following conditions or the performance characteristics of the product, such as RF performance will be adversely affected:
 - Storage in salty air or in an environment with a high concentration of corrosive gas, such as CI2, H2S, NH3, SO2, or NOX
 - Storage in direct sunlight
 - Storage in an environment where the temperature may be outside the range of 5°C to 35°C range, or where the humidity may be outside the 45 to 85% range.
 - Storage of the products for more than one year after the date of delivery Storage period: Please check the adhesive strength of the embossed tape and soldering after 6 months of storage.
- (3) Keep this product away from water, poisonous gas and corrosive gas.
- (4) This product should not be stressed or shocked when transported.
- (5) Follow the specification when stacking packed crates (max. 10).

23.5. SAFETY CAUTIONS

These specifications are intended to preserve the quality assurance of products and individual components.

Before use, check and evaluate the operation when mounted on your products. Abide by these specifications, without deviation when using the products. These products may short-circuit. If electrical shocks, smoke, fire, and/or accidents involving human life are anticipated when a short circuit occurs, then provide the following failsafe functions, as a minimum.

- (1) Ensure the safety of the whole system by installing a protection circuit and a protection device.
- (2) Ensure the safety of the whole system by installing a redundant circuit or another system to prevent a single fault causing an unsafe status.

23.6. OTHER CAUTIONS

- (1) This specification sheet is copyrighted. Please do not disclose it to a third party.
- (2) Please do not use the products for other purposes than those listed.
- (3) Be sure to provide an appropriate fail-safe function on your product to prevent an additional damage that may be caused by the abnormal function or the failure of the product.
- (4) This product has been manufactured without any ozone chemical controlled under the Montreal Protocol.
- (5) These products are not intended for other uses, other than under the special conditions shown below. Before using these products under such special conditions, check their performance and reliability under the said special conditions carefully to determine whether or not they can be used in such a manner.
 - In liquid, such as water, salt water, oil, alkali, or organic solvent, or in places where liquid may splash.
 - In direct sunlight, outdoors, or in a dusty environment
 - In an environment where condensation occurs.
 - In an environment with a high concentration of harmful gas (e.g. salty air, HCl,

Notes:

- (1) Abbreviation for Minimum Order Quantity (MOQ). The standard MOQ for mass production is 1500 pieces, fewer only on customer demand. Samples for evaluation can be delivered at any quantity via the distribution channels.
- (2) Samples are available on customer demand

25.1. INFORMATION REGARDING SOFTWARE VERSIONS

ENW89820/35A1KF:

The modules will be delivered with an empty flash. Customers need to program their own TI software in the production process. For details refer to the design guide.

ENW89820/35A3KF:

The modules are delivered with BlueRadios nBlue software. This software includes a bootloade and can be updated over the UART. For the latest revision refer to this link: http://blueradios.com/panasonic/index.php

Note: New customers seeking firmware and firmware support are required to register by providing an invoice number.

26. ROHS AND REACH DECLARATION

Hereby we declare to our best present knowledge based on declaration of our suppliers that this product follows the elatest official RoHS and REACH Directive.

Panasonic

Panasonic Industrial Devices Slovakia s.r.o Oravicka 616, 020 01 TRSTENA

Tel: +421(0)43 5303 200 Fax: +421(0)43 5303 207

Date: 20.11.2012

Dear Customer,

Panasonic Industrial Devices Slovakia s.r.o., guarantee that:

Directive 1907/2006 (REACH)

Substances from the candidate lists of so called "substances of very high concern" (SVHC) published by ECHA are regular monitored if SVHC substances are contained in our products above 0.1% (w/w).

Due to the high complexity of these substance investigations covering all of our global suppliers, this process required some time. We will provide you with all substance information regarding our products base on information collected from our suppliers.

Panasonic Industrial Devices Slovakia s.r.o. hereby declares that all products manufactured and delivered to your company have SVHC substances < 0.1% (w/w).

SVHC Substances:

SVHC Candidate list 1	(28/10/2008)	[15 Substances]
SVHC Candidate list 2	(13/01/2010)	[12 Substances]
SVHC Candidate list 2	(30/03/2010)	[1 Substance]
SVHC Candidate list 3	(18/06/2010)	[8 Substances]
SVHC Candidate list 4	(15/12/2010)	[8 Substances]
SVHC Candidate list 5	(20/06/2011)	[7 Substances]
SVHC Candidate list 6	(19/12/2011)	[20 Substances]
SVHC Candidate list 7	(18/06/2012)	[13 Substances]

Directive 2011/65/EC (RoHS)

We confirm that all products supplied to you including package do not contain the following substances which are banned by Directive 2002/95/EC (RoHS) or if contain a maximum concentration of 0.1% by weight in homogeneous materials for:

- Lead and lead compounds,
- Mercury and mercury compounds,
- Chromium (VI),
- PBB (polybrominated biphenyl) category, PBDE (polybrominated biphenyl ether) category and a maximum concentration of 0.01% by weight in homogeneous materials for:
- Cadmium and cadmium compounds.

28. HISTORY FOR THIS DOCUMENT

Revision	Date	Modification / Remarks
0.01	November 2011	1 st preliminary version.
0.02	November 2011	Deleted footnote in chapter 12.
1.00	April 2012	Released Version.
1.1	July 2012	Add chapter 25.1 Information regarding Software Versions. Link to LGA app note. Removed watermark. UART pinning for BR-SW version. I2C pinning for PAN1721 version. FCC, IC, IDs.
1.2	July 2012	Added remark "top view" for footprint. Corrected FCC ID to T7VPAN17. Change to the correct company name in footer.
1.3	Agust 2012	Change IC text in chapter 32.1 Change to the correct company name in footer. New format for chapter Related Documents
1.4	November 2012	Added some remarks to PAN1721 version. Added non antenna version part number to Ordering information.
1.5	December 2012	Added PAN1711 ES information
1.6	January 2013	Added dimensions and pinout for the non-antenna versions PAN171x.
1.7	January 2013	Minor changes in chapter 6, 31.4. Chapter 3 was included and chapter 34 BT Certificiation was added.
1.8	May 2013	Changed Block Diagram
1.9	August 2013	Included Crossreference for GPIOs to BlueRadios Pinout

30. GENERAL INFORMATION

© Panasonic Industrial Devices Europe GmbH 2012.

All rights reserved.

This product description does not lodge the claim to be complete and free of mistakes.

Please contact the related product manager in every case.

If we deliver ES samples to the customer, these samples have the status Engineering Samples. This means, the design of this product is not yet concluded. Engineering Samples may be partially or fully functional, and there may be differences to be published Data Sheet.

Engineering Samples are not qualified and are not to be used for reliability testing or series production.

Disclaimer:

Customer acknowledges that samples may deviate from the Data Sheet and may bear defects due to their status of development and the lack of qualification mentioned above.

Panasonic rejects any liability or product warranty for Engineering Samples. In particular, Panasonic disclaims liability for damages caused by

- the use of the Engineering Sample other than for Evaluation Purposes, particularly the installation or integration in an other product to be sold by Customer,
- deviation or lapse in function of Engineering Sample,
- improper use of Engineering Samples.

Panasonic disclaimes any liability for consequential and incidental damages.

In case of any questions, please contact your local sales partner or the related product manager.

31. REGULATORY INFORMATION

31.1. FCC NOTICE

The devices PAN17xx, for details refer to Chapter 25, including the antennas, which are listed in 31.5, complies with Part 15 of the FCC Rules. The device meets the requirements for modular transmitter approval as detailed in FCC public Notice DA00-1407.transmitter Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

31.2. CAUTION

The FCC requires the user to be notified that any changes or modifications made to this device that are not expressly approved by Panasonic Industrial Devices Europe GmbH may void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

CLASSIFICATION	PROD	OUCT SPECIFICATION	No. DS-17xx-2400-	102	REV. 1.9
SUBJECT		TOOTH LOW ENERGY MODE MODULE	PAGE	33 of 3	35
CUSTOMER'S COD PAN172x / PAN171x	I	NASONIC'S CODE IW89820AxKF / ENW89835AxKF	DATE	05.08.20)13

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

31.3. LABELING REQUIREMENTS

The Original Equipment Manufacturer (OEM) must ensure that FCC labeling requirements are met. This includes a clearly visible label on the outside of the OEM enclosure specifying the appropriate Panasonic FCC identifier for this product as well as the FCC Notice above. The FCC identifier is **FCC ID: T7VPAN17**. This FCC identifier is valid for all PAN17xx modules, for details, see the Chapter 25. Ordering Information.

In any case the end product must be labelled exterior with "Contains FCC ID: T7VPAN17"

31.4. ANTENNA WARNING

For the related part number of PAN17xx refer to Chapter 25. Ordering Information.

This devices are tested with a standard SMA connector and with the antennas listed below. When integrated in the OEMs product, these fixed antennas require installation preventing end-users from replacing them with non-approved antennas. Any antenna not in the following table must be tested to comply with FCC Section 15.203 for unique antenna connectors and Section 15.247 for emissions. The FCC identifier for this device with the antenna listed in item 1 are the same (FCC ID: T7VPAN17).

31.5. APPROVED ANTENNA LIST

Note: We are able to qualify your antenna and will add to this list as that process is completed.

Item	Part Number	Manufacturer	Frequency Band	Туре	Gain (dBi)
2	LDA212G3110K	Murata	2.4GHz	Chip-Antenna	+0.9

31.6. RF EXPOSURE PAN17XX

To comply with FCC RF Exposure requirements, the Original Equipment Manufacturer (OEM) must ensure that the approved antenna in the previous table must be installed.

The preceding statement must be included as a CAUTION statement in manuals for products operating with the approved antennas in the previous table to alert users on FCC RF Exposure compliance.

Any notification to the end user of installation or removal instructions about the integrated radio module is not allowed.

The radiated output power of PAN17xx with mounted ceramic antenna (FCC ID: T7VPAN17) is far below the FCC radio frequency exposure limits. Nevertheless, the PAN17xx shall be used in such a manner that the potential for human contact during normal operation is minimized.

End users may not be provided with the module installation instructions. OEM integrators and end users must be provided with transmitter operating conditions for satisfying RF exposure compliance.

32. INDUSTRY CANADA CERTIFICATION

PAN17xx is licensed to meet the regulatory requirements of Industry Canada (IC),

license: IC: 216Q-PAN17

Manufacturers of mobile, fixed or portable devices incorporating this module are advised to clarify any regulatory questions and ensure compliance for SAR and/or RF exposure limits. Users can obtain Canadian information on RF exposure and compliance from www.ic.gc.ca.

This device has been designed to operate with the antennas listed in Table 20 above, having a maximum gain of 0.9 dBi. Antennas not included in this list or having a gain greater than 0.9 dBi are strictly prohibited for use with this device. The required antenna impedance is 50 ohms. The antenna used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Due to the model size the IC identifier is displayed in the installation instruction only and can not be displayed on the modules label due to the limited size (8.7x15.6mm).

32.1. IC NOTICE

The devices PAN17xx, for details refer to Chapter 25, including the antennas, which are listed in 31.5, complies with Canada RSS-GEN Rules. The device meets the requirements for modular transmitter approval as detailed in RSS-GEN. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

32.2. LABELING REQUIREMENTS

The Original Equipment Manufacturer (OEM) must ensure that IC labeling requirements are met. This includes a clearly visible label on the outside of the OEM enclosure specifying the appropriate Panasonic IC identifier for this product as well as the IC Notice above. The IC identifier is 216Q-PAN17. This IC identifier is valid for all PAN17xx modules, for details, see the Chapter 25. Ordering Information.

In any case the end product must be labelled exterior with "Contains IC: 216Q-PAN17"

33. BLUETOOTH CERTIFICATION

The Design is listed as Controller Subsystem with QDID: B016552 https://www.bluetooth.org/tpg/EPL_Detail.cfm?ProductID=22941

The module is listed as EPL based on Texas Instruments QDID B016552.

To create an EPL, two Subsystems e.g. QDID: B016552 and QDID: B017183 (software stack) need to be combined.

34. EUROPEAN R&TTE DECLARATION OF CONFORMITY

Hereby, Panasonic Industrial Devices Europe GmbH, declares that the Bluetooth module PAN17xx and their versions is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC. As a result of the conformity assessment procedure described in Annex III of the Directive 1999/5/EC, the end-customer equipment should be labelled as follows:

C €

PAN17xx and their versions in the specified reference design can be used in the following countries: Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, The Netherlands, the United Kingdom, Switzerland, and Norway.

35. LIFE SUPPORT POLICY

This Panasonic product is not designed for use in life support appliances, devices, or systems where malfunction can reasonably be expected to result in a significant personal injury to the user, or as a critical component in any life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness. Panasonic customers using or selling these products for use in such applications do so at their own risk and agree to fully indemnify Panasonic for any damages resulting.
