

## LED INDICATORS, DUMMY PLUGS AND HOLE PLUGS

- 3. 492
- 4. 493
- 5. Hole Plug P1801

When inserted into a standard size telephone jack, the dummy plug actuates springs like a normal plug, except no signal is conducted through since the plug is made of nonconducting plastic. Dummy plugs can also be used to plug up unused jacks to prevent accidental insertion of an incorrect plug.

**SERIES 492:** 3-conductor with .25 inch diameter finger. Mates with 3-conductor MTJax® and Series M Hi-D Jax®, and other standard telephone jacks have .25 inch inside diameter sleeves.

**SERIES 493:** 2-conductor with .25 inch diameter finger. Mates with 2-conductor MTJax®, Series M Hi-D Jax®, and other standard telephone jacks having .25 inch inside diameter sleeves.
