Trust Ty-Rap® Cable Ties to securely fasten your cables!

Installers Know and Trust Ty-Rap High-Performance Fastening Products from Thomas & Betts

Wire and cable bundling is an integral part of modern electrical and electronic installations. To finish your harnessing and bundling project as reliably, professionally looking and economically as possible, choose genuine Ty-Rap cable ties. These fastening systems include a full range of cable ties, identification ties, clamps, bases, harnessing aids and installing tools. Using Ty-Rap fastening systems for all fastening jobs, large and small, will speed and improve the reliability of harnessing and wire bundling while saving you money.

Ty-Rap® Cable Fastening Systems

Harnessing

- Harness Board pre-wiring prior to installation
- Large OEMs — Automotive, Aerospace, Computers, Electronics, Copiers, Appliances and other Durable Goods

T&B fastening systems for large volume cable tying combine high-speed ergonomically designed tools, along with a wide selection of ties and harnessing aids to meet your application requirements. Accessories include various mounting bases, harnessing aids, retainers, clips, clamps, supports, posts, pins and guides that allow the wire to be quickly routed with or without the use of harness nails.

Other Applications

- HVAC
- Recreational
- Telecom & Utility
- Packaging

Ty-Rap cable ties are remarkably well suited for a variety of other non-electrical applications. Ty-Rap cable ties exceed UL 1565 requirements for smoke developed and heat release for use in air handling spaces. Ty-Rap cable ties meet international standards such as CSA and CE as well as UL,  Belcor, ADC and military specifications in North America. T&B also offers a complete stainless steel and Deltec® cable fastening system for demanding and weather-resistant applications. Choose genuine Ty-Rap cable ties for the rugged "Grip of Steel." Look for the oval head.

Point-to-Point and Long Distance Wiring

- Bundling & fastening cables between equipment
- Panel & Machine Tool Builders
- Industrial & Commercial Applications, Refineries, Office Buildings

Installers prefer the ease of use and exceptional durability of genuine Ty-Rap cable ties. Engineered for labor savings and high performance, Ty-Rap cable ties are commonly used in a variety of applications. Standoffs, bulkhead mounting bases, adhesive mounting bases and a wide variety of clamping devices will meet or exceed any requirements. Weatherable and special material Ty-Rap cable ties are exceptionally suited for years of service in extreme environments.

Cable Fastening Accessories

Choose from one of the largest assortments of mounting bases, clips and clamps, spacers, lashing straps, harness board accessories, braided wire protection sleeving, and accessories for your fastening needs. Use Thomas & Betts cable fastening accessories for the finishing touch on your next wiring project.

Tools

Ty-Rap installing tools properly complete the installation of the cable tie. Ties are cinched to the proper tension and the excess tail is cut off precisely flush with the head, leaving no sharp corners or ragged edges. Ty-Rap installing tools are lightweight with narrow noses and slim profiles for work in tight spaces or between harness board nails. The operation is quick, reliable and cost effective.

Why Choose Genuine Ty-Rap® Cable Ties?

Oval, Low Profile Head

gives a professional, quality look to wire bundling projects. The classic-shaped head is designed to prevent snags on uneven surfaces and easier to pull through bulkheads. There are no sharp edges, so these ties are also easier on the installer's hands.

The **Turned-up Tail** orients the tie for easy assembly, making the ties easier to pick up on a flat surface.

No-Slip Tail provides easy grip during tensioning. Ty-Rap cable ties feature a unique friction surface designed to reduce slippage during installation.

For a whole bundle of reasons, trust only Genuine **Ty-Rap Cable Ties** by Thomas & Betts in your next wiring installation.

"The Grip of Steel"® Non-Magnetic Stainless Steel Locking Device insures both maximum strength and the right tightness every time. Because there are no notches, Ty-Rap Cable Ties provide an infinite number of locking positions while fastening the tie at the precise bundle diameter needed.

Versatile Nylon 6.6 Material provides high strength, a wide temperature range and prevents toxic or irritating emissions. Ty-Rap Cable Ties are also available in weather-resistant versions, heat-stabilized, flame-retardant, polypropylene, nylon 12, hook and loop, fluoropolymer, and stainless steel materials for a variety of extreme environments.

Smooth, Notchless Body reduces stress concentration points under tension, making the tie stronger and lower profile than notched body ties.

Ribbed and Stippled Body "grips" the bundle and prevents slippage. Rounded edges protect insulation, preventing sharp edges from damaging cables.

Cable ties made from natural nylon 6.6 are excellent performers in most applications.

For use in temperatures ranging from -40° F to 185° F (-40° C to 85° C).

† Recognized Models

• UL Listed Natural 6.6 Nylon Cable Ties are suitable for use in air handling spaces (plenums) in accordance with Section 300.22 (C) & (D) of the National Electrical Code.

• UL File No. E49405

• Natural nylon color

The colors you need in convenient packs!

—	TY25M-22	Beige, UV-Stabilized Nylon	7.31/185.67	50/222.40	1,000 Ties

For use in temperatures ranging from -40° F to 185° F (-40° C to 85° C).

Suitable for use in air handling spaces in accordance with Section 300.22 (C) & (D) of the National Electrical Code.

* 100 standard ties in black, brown, red, orange, yellow, green, blue, purple, gray, and white (10 each)

Recommended tooling — ERG-50, WT1-TB

Note: The base catalog number for Ty-Rap® cable ties is for natural (non-colored) nylon without the UV-stabilizing additive, which is not suitable for outdoor use. For colored UV-stabilized nylon Ty-Rap® cable ties, add the following suffix numbers to the base catalog numbers. For example, TY25M is natural (non-colored) nylon for indoor use only, while TY25M-2 is red UV-stabilized nylon for indoor or outdoor use. (Consult customer service for ordering information.)

COLOR	SUFFIX NO.	COLOR	SUFFIX NO.	COLOR	SUFFIX NO.	COLOR	SUFFIX NO.
Black	X	Orange	3	Blue	6	White	9
Brown	1	Yellow	4	Purple	7	Beige	22
Red	2	Green	5	Gray	8		

How to Order Colored Ty-Rap® Cable Ties and Accessories

Cable ties at your fingertips!

Ty-Rap Tote® 4", 8" and 11"-14" Combination Length Cable Tie Dispensers

- Durable, lightweight polyester exterior and tough vinyl interior construction
- Rugged diamond-shaped cutout for easy access to cable ties (up to 8", 11"-14" lengths) and rectangular-shaped (for 4" length)
- Handy belt clip and chrome steel loop for easy attachment
- Resealable hook-and-loop flap for easy refill
- Includes 100 genuine Ty-Rap® cable ties

Keep your cables clearly identified!

Ty-Rap® Nylon 6.6 Identification Cable Ties

Self-locking Ty-Rap® identification ties are available in both single and multiple configurations. They can be marked with the special Thomas & Betts black or red marking pen (see **page D-8**) that immediately produces a permanent legend, or they can be heat stamped. Because the ties serve the dual purpose of tying and identifying, you will achieve extra economies. They can be applied with the standard Ty-Rap® tying tools used for regular ties.

Custom Heat Stamping

Thomas & Betts' Custom Heat Stamping provides an economical way to fasten and identify cable bundles. Mark nylon cable ties, identification cable ties, and identification plates to suit your application.

- 1/16", 1/8", 3/16" characters available
- Standard type — Gothic Capitol
- Character sizes can be mixed from line to line on Identification cable ties
- Alphanumeric and sequential numbering available
- Six-digit sequential numbering available in 1/16" characters
- Eight-digit sequential numbering available in 1/16" and 3/16" characters
- The following colors of heat stamping are available — black, blue, green, red, yellow, orange, and white
- Special logos and different type styles can be accommodated when camera-ready artwork is provided
- Minimum order quantity is 3,000 pieces per part number and message

See E-Z-Code section I for all of your labeling needs.

EZL-100 Thermal label printer, see pages I-4.

Stay organized!

Identification Tags

Ranging in length from 1.25" to 2.5", the identification plates are secured to the cable with Ty-Rap® ties. They are composed of .010"- and .015"-thick nylon 6,6,

and have a surface that can be marked easily. Thomas & Betts offers custom heat stamping of your plates at the factory.

Snaps onto the head of a conventional cable tie to convert it to an identification tie.

- When snapped onto the tie head, the tag is conveniently held in place until it is permanently fastened
- Offers maximized inventory control because the I.D. tag will accommodate different tie lengths and materials

Mark and bundle simultaneously!

Snap-On Identification Marker Tag

- Enables marking and bundling to be done in one operation
- The marking can be made with a Thomas & Betts permanent marking pen (black or red); catalog numbers: WT163M-1 (black), WT163M-3 (red)
- The identification tags are sold separately and can be conveniently snapped on the cable ties at the assembly location just before being installed on the bundle
- Made of natural nylon 6.6

Striped-Colored TY-RAP® Cable Ties for Identification Telephone Cable Binder

Designed primarily for P.I.C. and station cable binder marking, these self-locking ties install without tools in less than 10 seconds. Compared to an installation time of 30–60 seconds using the twisted-wire method, the time saving is substantial. High-contrast color stripes extend to end of tail for instant, permanent identification of binder.

NOTE: Loop tie through hole in frame, around electrical, hydraulic, or air hoses to be clamped, and through head. Tighten and cut off with Ty-Rap tool. Visually looks like a rivet.

• For use in temperatures ranging from -40° F to 185° F (-40° C to 85° C).
• Black color

Cable Ties — Material Selection Ordering Guide

Select the cable ties you need for special environments!

Thomas & Betts offers Ty-Rap® cable ties and accessories in a wide variety of materials, each suited for specific environments. The purpose of this document is to assist you in choosing the best material for your particular application. The effects of weathering, flame, chemicals, extreme temperatures, and radiation on the different materials are clearly presented in the following tables to simplify this process. Once you have determined the most suitable material, you can choose from the wide variety of Ty-Rap® cable ties, identification ties, mounting bases, lashing ties, etc., offered by Thomas & Betts.

General — How to use Table 1:

Table 1 simplifies the material selection process by giving the relative performance ratings of the materials offered by Thomas & Betts. For example, if your application is in an extremely cold environment, four materials will answer your need: 1. Radiation resistant fluoropolymer, 2. Low smoke fluoropolymer, 3. Nylon 12, 4. Stainless steel. Then, cost may be your next most important criteria, so out of those four options, nylon 12 would be the most cost effective. However, if tensile strength is important, then stainless steel would be the better choice.

Refer to Tables 2 and 3 for more detailed information regarding physical properties of the materials and chemical resistance of the materials respectively.

It is extremely difficult to provide data on all the possible combinations or conditions that can occur. This information is based on data provided by the manufacturers of the specific materials listed and is provided only as a general guide. No specific recommendation is intended. As each application may differ, cable tie samples should be tested in the intended application by the user to determine suitability.

Flammability ratings for selecting Ty-Rap® cable ties

NOTE: Flammability ratings of Ty-Rap® cable tie materials are shown in Table 2. These tests for flammability of plastic material are intended to serve as a preliminary indication of acceptability with respect to flammability for particular applications.

UL 94 vertical burn test procedures

Test specimens of the material, with dimensions 5" x ½", with the thickness intended for use in the end product, are tested in both the manufactured condition and in the aged state. The test requires that the specimen be supported in a vertical fixture and a precisely controlled flame applied for a

10- second period. The flame is removed and the duration of flaming is noted. If the flame extinguishes, a second exposure to flame for 10 seconds is applied and duration of flaming is again noted. It is observed and recorded whether or not test specimens drip flaming particles that ignite a cotton swatch.

Material Selection Ordering Guide

Materials classed UL 94V-0:

A material classed V-0 shall:

- A. Not have any specimens that burn with flaming combustion for more than 10 seconds after either application of the test flame.
- B. Not have a total flaming combustion time exceeding 50 seconds for the 10 flame applications for each set of five specimens.

C. Not have any specimens that burn with flaming or glowing combustion up to the holding fixture.

D. Not have any specimens that drip flaming particles that ignite the dry absorbent surgical cotton located 12" below the test specimen.

E. Not have any specimens with glowing combustion that persists for more than 30 seconds after the second removal of the test flame.

Materials classed UL94V-1:

A material classed V-1 shall:

- A. Not have any specimens that burn with flaming combustion for more than 30 seconds after either application of the test flame.
- B. Not have a total flaming combustion time exceeding 250 seconds for the 10 flame applications for each set of five specimens.

Chemical Resistance

Table 3 shows the resistance of Ty-Rap® cable tie materials to various chemicals. The table is designed to help you determine the cable tie material best suited for a particular chemical environment.

Material Selection Ordering Guide

- C. Not have any specimens that burn with flaming or glowing combustion up to the holding fixture.
- D. Not have any specimens that drip flaming particles that ignite the dry absorbent surgical cotton located 12" below the test specimen.
- E. Not have any specimens with glowing combustion that persists for more than 60 seconds after the second removal of the test flame.

Materials classed UL94V-2:

A material classed V-2 shall:

- A. Not have any specimens that burn with flaming combustion for more than 30 seconds after either application of the test flame.
- B. Not have a total flaming combustion time exceeding 250 seconds for the 10 flame applications for each set of five specimens.

- C. Not have any specimens that burn with flaming or glowing combustion up to the holding fixture.
- D. Be permitted to have specimens that drip flaming particles that burn only briefly, some of which ignite the dry absorbent surgical cotton placed 12" below the test specimen.
- E. Not have any specimens with glowing combustion that persists for more than 60 seconds after the second removal of the test flame.

† Not Recognized Model.

Ty-Rap® Nylon 12 Cable Ties

This material provides very good resistance to ultraviolet light and chemical exposure. Nylon 12 is a lower, moisture- absorbing material than 6.6 nylon and the effect of water on properties is much less.

Color — Black

For use in temperatures ranging from -40° F to 185° F (-40° C to 85° C).

Ultraviolet and weather resistant!

Cable Ties for Special Environments

Perfect for outdoor applications!

Ty-Rap® Heat Stabilized/ Ultraviolet Resistant Cable Ties

- Ideal for Industrial OEM and MRO (includes, but not limited to industrial, lawn/garden/farming equipment, recreation vehicles, heavy equipment)
- Can be placed in environments requiring heat stabilization and UV resistance
- Provides a smooth, low-profile look and offers unlimited tensioning range for a perfect fit
- Features an oval head on every original Ty-Rap® Cable Tie
- Quicker to install and less expensive than metallic fasteners, lacing cord or tape
- Made of UV resistant, heat-stabilized nylon

Color — Black

For use in temperatures ranging from -40° F to 221° F
-40° C to 105° C

Beat the heat!

Ty-Rap® Extra High-Temperature Cable Ties

- Ideal for Industrial OEM and MRO (includes, but not limited to metal processing, paper mills, lighting and commercial construction markets with high temperature environments up to 302° F (150° C).
- Provides a smooth, low-profile look and offers unlimited tensioning range for a perfect fit
- Features an oval head on every original Ty-Rap® Cable Tie
- Quicker to install and less expensive than metallic fasteners, lacing cord or tape
- Made of extra high-temperature resistant nylon

Color — Light Green

Stainless Steel Cable Ties and Accessories

**Strong, fire proof and easy to apply —
for safe cable bundling.**

Dual Lock

Thomas & Betts has a complete package of stainless steel cable ties and accessories that are easy to apply and superior in quality. These products have been designed for tying, lashing, and identification applications in demanding environments such as food processing, boiler rooms, chemical plants, refineries, pulp/paper mills, shipyards and offshore oil platforms. They are made of a variety of high-quality stainless steel materials that offer excellent corrosion resistance, high temperature, and durability characteristics. There is also a variety of high-performance installation and identification tools to complete your cable tie accessory needs.

For cable bundling, identification tags and other general bundling applications — especially in hazardous environments — Thomas & Betts Stainless Steel Cable Ties provide a strong, safe, permanent installation with a unique, dual locking mechanism.

The Type 304 stainless steel ties are completely fireproof — no toxic fumes, no sagging cables. They are extremely resistant to corrosion and UV light, with the ability to withstand the harshest temperature extremes. Yet they are surprisingly economical.

These low-profile ties are fast and easy to apply. A quick squeeze of the installation tool forms two strong locks — a dimple lock and a fold lock for maximum holding strength.

Their two-piece configuration adds to its versatility. Available in standard lengths to wrap bundle diameters from 1–10", Thomas & Betts Stainless Steel Cable Ties can be supplied in other lengths on special order.

Low-profile Thomas & Betts Stainless Steel Ties are fireproof and resist corrosion, UV light, and extreme weather conditions for safe, permanent cable bundling, yet they are cost effective for your demanding applications.

Installation Hand Tool

The installation hand tool is a lightweight, pocket-size hand tool that quickly and easily applies the stainless steel cable ties.

To use, simply separate the pull-up handle from the body, and insert the cable tie tail as far as possible. Squeeze the pull-up handle until the band is tight. Finally, move the pull-up handle to the locking/cut-off position by moving it away from the body as far as it will go. Then squeeze to form the dual lock and cut off the excess tail.

After wrapping the object to be tied, insert the free end of the tie through the buckle and into the tool.

Squeeze the handle of the tool to create the dual lock and cut off the tail. The cable tie forms a low-profile dual lock.

The tail is formed into a fold lock behind the buckle. The tool forces a dimple in the band into a hole in the buckle.

304 Stainless Steel

.015" (.38mm) Thickness

NOTE: Other lengths available on special request.

Add suffix -316 for 316 Stainless Steel.

Perfect for mini-sized stainless steel ties.

Mini Tie Installation Tool

- Pocket-sized, lightweight
- Applies mini-size stainless steel ties

STD. PKG. CAT. NO.	DESCRIPTION	WEIGHT LBS./KG.	STD. PKG. QTY.
WTA290	Hand tool to apply mini stainless steel cable ties; easy-to-use tool applies tension, locks tie with the dual lock, and cuts off band flush with top surface of buckle	1.17/.53	1

Pocket-sized hand tool for quick and easy cable tie installations.

Standard Tie Installation Tool

- Lightweight
- Applies standard-size stainless steel ties

STD. PKG. CAT. NO.	DESCRIPTION	WEIGHT LBS./KG.	STD. PKG. QTY.
WTA250	Hand tool to apply standard stainless steel cable ties; easy-to-use tool applies tension, locks tie with the dual lock, and cuts off band flush with top surface of buckle	1.17/.53	1

Multi-Lok Stainless Steel Self-Locking Cable Ties

Strong — holds in excess of 200 lbs. — and self locking.

Type 316 Stainless Steel — Uncoated

- Corrosion-resistant, providing a safe, strong, worry-free hold
- Unique, self-locking, multiple-locking system holds in excess of 200 lbs.
- Manufactured from Type 316 stainless steel
- Available in two widths and various lengths

STD. PKG. CAT. NO.	TENSILE STR. LBS./N.	WIDTH IN./MM	LENGTH IN./MM	WEIGHT LBS./KG.	STD. PKG. QTY.

.010" (.245mm) Thickness

How It Works:

As the free end of the Multi-Lok tie passes through the buckle, three separate teeth (four teeth in the 12mm Multi-Lok) mesh with corresponding slots in the band, automatically locking the tie as it is being tensioned.

Type 316 Stainless Steel — Nylon 11 Coated

- Nylon 11 weather-resistant coating is unaffected by UV sunlight, resistant to corrosion, chemicals, weathering and protects cable insulation

- Coated with halogen-free, non-toxic black nylon 11

For use in temperatures ranging from -20° F to 122° F (-29° C to 50° C)

Reusable Stainless Steel Cable Ties

Ties to use and reuse with quickness and ease!

Reusable Stainless Steel Cable Ties — Coated

- Made of high-strength, corrosion-resistant 200/300 series stainless steel
- Coated with a non-toxic, halogen-free, low-smoke Nylon 11, protecting cables from damage or interference due to direct contact with the stainless steel
- Nylon 11 is also chemical and weather-resistant, UV-protective, extremely flexible at low temperature, user-friendly on installer's hands and easy on bundles
- Unique buckle design for quick, easy application and re-use

1. Insert cable tie tail through holding tabs and locking emboss
 2. Bend cable tie tail up
 3. Insert cable tie tail back through holding tabs, creating as tight a bend as possible. For increased tensile strength follow steps #4 and #5
 4. Bend cable tie tail up
 5. Fold cable tie tail over holding tabs
- *Patent Pending

Ty-Rap® Stainless Steel Cable Ties have passed a variety of mechanical, environmental, and electrical tests. Other data can be made available upon request.

Stainless Steel Cable Ties, Tools & Accessories

Boiler rooms, shipyards, or off-shore oil platforms — a match for any severe environment!

Stainless Steel Strap Cable Ties

- Stainless steel strap cable ties have been designed for high-temperature applications and for use in areas of harsh, corrosive environments
- Rated at 200-lb. tensile strength
- Smooth edges protect both the cable insulation and the installer

Stainless Steel Self-Locking Ties

Spring feature provides an extra-snug fit!

Stainless Steel Ties with Roller Bar Locking Mechanism

Thomas & Betts offers a line of self-locking, stainless steel ties for indoor and outdoor use. This low-profile design features an internal locking roller bar and spring-tension head that ensures a secure fit.

Features and Benefits

- Spring feature provides extra-snug fit in applications where bundle tightness is critical
- Internal locking roller bar (average slip, within the locking mechanism at 100 lb. (444.8 N) load is 55% lower than conventional ball lock design)
- Rounded edges and smooth surfaces for fast, safe hand installation
- Buckle length is 38% less and height is 24% less than the conventional ball-locking design
- 5 standard lengths with custom lengths available
- Available in two grades of stainless steel (302/304 for standard applications and 316 for extra corrosion resistance)

Ideal Applications

- High-temperature locations
- Marine environment (ship building, salt water environment)
- Harsh environment (oil rigs, refineries, mills food processing plants, auto car washers)
- Wash down areas

Roller Locking Mechanism vs. Ball Locking Mechanism

CHARACTERISTIC	SELF-LOK	BALL LOCK
Rating (lbs./n)	150/667.20	100/444.80
Buckle Length (inch/mm)	.260/6.604	.420/10.668
Height over Buckle (inch/mm)	.130/3.302	.170/4.318
Avg. Slip @ 100lb. Load (inch/mm)	.090/2.286	.200/5.080
Normal Mode of Failure	Cont. Slip	Loss of Ball
Buckle Retention	Smooth ID	Fold Under
Tie Length	Same	Same
Material	304 or 316 SS	304 or 316 SS

Unique Spring-Tension Head Design provides extra-snug fit where bundle tightness is critical.

How It Works

Insert the tail into the buckle. The internal locking bar rolls freely as the tie is tightened.

Once the proper tension is reached, the tool automatically cuts off the tail. The bar then wedges into the buckle, locking it tightly against both the top and bottom of the band.

Application Tool

DAS250 HAND TOOL (see page D-60)

Stainless Steel Self-Locking Ties

Engineered to withstand the harshest environments!

Ty-Rap® Cable Fastening Systems

Heavy-Duty Stainless Steel Ball-Lock Cable Ties

These one-piece, self-locking stainless steel cable ties offer quick and easy installation — no crimping or folding required — and a strong, reliable lock. Choose among a variety of sizes and materials to meet all of your wire and cable bundling needs, even in the most extreme environments.

Fast, easy installation

- Self-locking — no time-consuming crimping or folding required
- Stainless steel ball in low-profile, wedge-shaped head locks tie securely in place
- Angled tail enables fast, easy insertion
- Rounded edges and smooth surfaces protect installer's hands

Wide range of sizes

- Six standard lengths cover most applications with custom lengths available
- Two standard widths offer tensile strength of 100 lbs. (444.8 N) or 250 lbs. (1,112 N)

Three materials suit a variety of environments

- 302/304 grade stainless steel for standard applications
- 316 grade (marine-grade) stainless steel for extra corrosion resistance
- 316 grade (marine-grade) stainless steel, fully coated with low-smoke, Halogen-free polyester to withstand continuous exposure to salt spray, sunlight, petroleum and chemicals

Typical Applications

- Offshore drilling
- Petrochemical processing
- Shipbuilding
- Food and beverage processing
- Pharmaceutical processing

Specifications

- Operating Temp. Range:
Uncoated: -112° F to 1,000° F (-80° C to 538° C)
Coated: -40° F to 302° F (-40° C to 150° C)
- Approvals/Standards: UL, CE, Lloyd's Register, Germanischer Lloyd, American Bureau of Shipbuilding, Det Norske Veritas, RoHS compliant

Application Tool

DAS250 HAND TOOL (see page D-60)

(Adjustable tension, automatic cut-off)

For a complete listing of Application Tools, see pages D-58–D-60.

Strong, long-life and cost-saving method of securing communication cables.

The Deltec® Cable Support System

The Deltec® Cable Support System is a user-friendly product designed to provide ease and flexibility in fastening communications cables to messenger strand. It is equally well suited for copper conductor cable, coaxial cable, fiber optic cable and inner duct in aerial applications.

The Deltec® system answers your aerial cable needs with innovative design and state-of-the-art materials. This system includes weather-resistant acetal cable straps, marine grade locking devices, and base hanger accessories for specific applications where mounting is required.

Pre-assembled Deltec® cable straps are available in standard lengths of 10" (254 mm), 13.5" (342.9 mm), and 27" (685.8 mm). Convenient 50' (15.24 m) to 3500' (1066.8 m) reels where specific lengths need to be established by the installer in the field are available. Additional "standard" lengths can be established for applications where higher volumes prevail.

Advantages of the Deltec® System Include:

- Proven years of service
- No sharp edges — craft friendly! Cable friendly!
- Ease of installation — one wrap, no re-treading of re-strap
- Lowers installation costs
- High tensile strength after fastening
- Total flexibility in lengths when using reel
- Stackable spacers accommodate all cable sizes — no need to stock multiple sizes of individual height spacers
- Spacer designed to retain strap on each side and cradle the cable, providing restricted movement of spacer and preventing damage to cable
- In situations where multiple cables are supported, the T&B TCP360 stackable spacer may be rotated 90° and installed similarly to a single cable, yet provide the same restricting features (unlike those commonly used today)
- Month and year of manufacture stamped into strap material
- Squirrels and vermin won't eat it!

Extra security!

Cable Tie with Double-Locking Head

The recommended maximum continuous static loading for the DELTEC® straps is 20 lbs. per strap. For best results, suggested spacing is 15". It's the responsibility of the user to determine whether or not their application meets our recommendation.

NOTE: Use WT3D Tool for tensioning and cutoff.

Specifications

- Strap and Body: Weatherable acetal; offers superior resistance to sunlight, moisture, and salt environments
- Locking Device: Marine-grade corrosion-resistant copper alloy
- Deltec System Temperature Range: -30° F to 150° F; (-34° C to 66° C)
- Minimum Tensile Strength: 250 lbs. minimum (1,211 N)
- Outdoor Life: Designed to last a minimum of 20 years
- Continuous Load: 20 lbs. (9.07 kg)
- Continuous Use Temperature: -85° F to 194° F; (-65° C to 90° C)
- Color: Black

Hook and Loop Fasteners

New version available — UL94V-2 rated material.

FO, FOL, FOS and FOR Series

- High-quality Hook & Loop Fasteners designed specifically for Thomas & Betts
- Enables quick and convenient bundling of data and fiber optic cables
- Sizes available to accommodate varying bundle diameters
- Screw and adhesive mounting bases provide multiple mounting options

FO Series Loop Ties

Wrap pre-determined bundle diameters using the convenient slotted head!

FOL Series Buckle Ties

Polymer buckles provide added strength and stability.

FOS Series Strip Ties

Pre-cut lengths make bundling a cinch!

FOR Series Rolled Hook and Loop

Rolled hook and loop material enables custom cut lengths, avoiding waste.

Fasteners available in these colors: Black, Brown, Red, Orange, Yellow, Green, Blue, Gray, and White. Please consult customer service for delivery and availability.

—40°F/—40°C to 176°F/80°C

- Natural nylon color.

Low-Profile All Nylon Cable Ties

Ideal for precision bundling!

Low-Profile All-Nylon 6.6 Cable Ties

- Low-profile, contoured head reduces clearance required for the bundle and enhances the appearance of your harness
- The safeguard wall eliminates exposure to sharp edges
- The saddleback fits snug against the contour of the wiring harness
- Sizes and colors available to accommodate varying requirements

Low-profile contoured head compared with the profile of a common cable tie.

This fastener design from Thomas & Betts is ideal for use where clearance is a necessity. A unique saddleback design curves to form a snug fit around the bundle and allows for easy pull-through in bulkheads and any other tight spaces. Our contoured head eliminates snagging, and sharp edges are reduced by our safeguard walls.

Natural nylon color

For use in temperatures ranging from -40° F to 185° F (-40° C to 85° C).

The badge holder that won't leave you out in the cold!

Badge Holder Nylon 6.6 Cable

- Designed specifically for ticket or badge attachment to prevent damage when in use
- Incorporates a loop diameter restriction device that forms the proper sized 1¼" loop required to hold the ticket or badge in place and lay flat
- Prevents the tie from being over-tightened and damaging the ticket or badge
- The Badge Holder is tamper-resistant and smooth up to the restriction point to keep it from being reused
- The Badge Holder is designed with a flexible short round tail, safely eliminating sharp edges
- Affordable at just pennies per fastener!

			TIE WIDTH ACCOM.	WIDTH IN./MM.	LENGTH IN.		
—	TC826-TB	#8 screw	.19	.50/12.70	1/25.40	—	1,000
TC5828	TC828-TB	#8 screw	.19	.39/9.91	.88/22.23	100	1,000

The TC826-TB mounting base can be used to tie bundles running parallel or perpendicular to length of base.
The TC828-TB mounting plate also handles ties installed in either direction and is somewhat smaller than TC826.
Natural nylon color.
For use in temperatures ranging from -40° F to 185° F (-40° C to 85° C).

Four-way screw mount for cable ties up to 50-lb. (222 N) tensile strength!

Four-Way Mount

- Mount with #6 or #8 screws
- Available in 6.6 natural nylon

Ideal for assembly applications.

Self-Aligning Cable Clamps

- Molded-in saddle washer enhances performance and appearance
- Self-alignment feature makes this clamp ideal for assembly applications
- 14 diameters and 2 widths with mounting holes for #4 through #10 screws
- UL® Flammability W,NY 94 V-2; W,TZ 94 V-0.
- Clamped in natural and heat-stabilized black nylon 6.6, and fluropolymer for harsh environments
- Item numbers molded-in for easy identification
- Replace "M" or "D" with "C" for 100 pack
- Temperature Rating: -40° F to 185° F (-40° C to 85° C); Heat-Stabilized: -40° F to 221° F (-40° C to 105° C); Fluropolymer: -50° F to 302° F (-45° C to 150° C)

Harnessing Accessories

Several mounting styles available.

Mechanical-Locking Routing Clamps

- Clamp acts as a retainer during wire routing, and as a permanent clamp when desired

STD. CAT. NO.	MOUNTING HOLE SIZE IN./MM.	BUNDLE DIA. IN./MM.	MAX. WIRE WIDTH IN./MM.	LENGTH IN./MM.	STD. PKG. QTY.
TC88	.250/6.35	.500/12.7	.250/6.35	.891/22.63	100
TC95	.250/6.35	1.000/25.4	.500/12.7	1.590/40.39	100

Natural nylon color.
For use in temperatures ranging from -40° F to 185° F (-40° C to 85° C).

Harness Clips

- Low installation cost
- Releasable
- For grouping wires in appliances, office equipment and other applications
- Adjustable, self-locking clip requires no tools for installation

How it works:

A projecting prong is simply pressed into a 1/4" hole, where it compresses and locks. The simple ratchet-type lock is released by moving the locking lever.

BULK PKG. CAT. NO.	MOUNTING HOLE SIZE IN./MM.	MAX. WIRE BUNDLE DIA. IN./MM.	BULK PKG. QTY.
HCP438	.250/6.35	.375/9.53	1,000

Natural nylon color.
For use in temperatures ranging from -40° F to 185° F (-40° C to 85° C).

Bundle-Retaining Clamp

- AC-loop
- Easy to add wires

STD. PKG. CAT. NO.	MOUNTING METHOD	BUNDLE DIA. IN./MM.	MAX. WIRE WIDTH IN./MM.	STD. PKG. QTY.

For use in temperatures ranging from -40° F to 185° F (-40° C to 85° C).

Mounting Bases for Heavy-Duty Applications

Designed for indoor or outdoor use and heavy-duty applications.

Framing Channel Clamp

- Quick and easy to install on existing metal framing channel
- Installs with a push and twist
- Smooth design protects cable insulation
- Takes range of cable diameters

When fastening wire bundles, cables or hoses to framing channels, you can cut costs considerably by using the Ty-Rap® cable clamp. It's made of smooth, weather-resistant nylon and designed to protect cable insulation and hoses from wear or damage, which can occur with metal clamps. The clamp may be used for both indoor or outdoor applications. It quickly installs in the framing channel with a simple push and twist. It requires no screws, nuts or tools. The clamp fits all 1½" and 1¾" channels regardless of channel depth.

STD. PKG. CAT. NO.	CHANNEL SIZE (IN.)	MAXIMUM TIE WIDTH ACCOM.	STD. PKG. QTY.
TC5363X	1½ & 1¾	.301/7.65	50

• Made from high-impact weather-resistant black nylon
For use in temperatures ranging from -40° F to 185° F (-40° C to 85° C).

Specially designed head is range-taking.

Ty-Rap® Mounting Base for Masonry and Brick Surfaces

- Quick, easy installation without cumbersome adhesives or epoxies
- Provides a quick, easy and dependable means of attaching cable and wires to masonry surfaces
- Installs by tapping it into a drilled hole
- It's immediately ready to accept a cable tie and wire bundle — no tedious surface preparation; no waiting for adhesives to set
- Replaces a variety of anchors, clamps, screws and adhesives
- Designed for both indoor and outdoor applications
- Only two sizes to stock — reduces inventory

STD. PKG. CAT. NO.	HOLE SIZE IN MASONRY	MAXIMUM TIE WIDTH ACCOM.	STD. PKG. QTY.
TC5358	¼	.190/4.83	100
TC5359	⅜	.500/12.70	50

• Made of a special impact and ultraviolet-resistant black nylon
For use in temperatures ranging from -40° F to 185° F (-40° C to 85° C).

Weather-resistant!

Ty-Rap® Mounting Base for Lashing Tie

- For use with lashing ties up to .500" width (i.e. TY5409)
- High impact

• Black nylon construction
For use in temperatures ranging from -40° F to 185° F (-40° C to 85° C).

Mounting Bases for Heavy-Duty Applications

A fast and simple harnessing method for neat, versatile wire management.

Stud Mount Fastening System

- Great for harnessing wires, cables and hoses to truck and trailer chassis
- Fast, easy installation, using standard 3/8" power drill and application tool or simply hammer on
- Unlimited harnessing flexibility using conventional T&B cable ties
- Custom drill bit quickly installs base to proper torque — won't crack or break mounting base due to being overtightened
- Unique 4-way multi-directional design
- 10-position harness capability
- Available for 3/8", 1/2", 5/8", and 3/4" stud/bolt sizes
- Self-tapping thread design for reliable installation onto stud
- High pull-out strength of 500+ lbs.

Thomas & Betts Stud Mount Fastening System is a fast and simple harnessing method for neat, versatile, cord, cable, hose, and wire management. Using a custom drill bit for your 3/8" power drill, the Stud Mount base is quickly attached onto a threaded stud or bolt to the proper torque—every time. The innovative "X" design of the base reliably supports many types of cable or hose assemblies using a wide range of conventional T&B cable ties. Designed with 10 separate lashing positions, the Stud Mount offers unlimited wire harnessing arrangements. T&B's Stud Mount is available in four convenient stud bolt sizes.

The Stud Mount Cable Fastening System includes a range of bases and the custom drill bit that mounts all sizes.

During installation, the custom Stud Mount drill bit application tool ejects itself from mounting base, ensuring proper torque and preventing cracking or breaking of the mount from being overtightened.

WTXM	Application Tool	—	Tool Steel	—	1

• Material: Impact-resistant weatherable black nylon
For use in temperatures ranging from -40° F to 185° F (-40° C to 85° C).

Virtually unlimited harnessing flexibility is provided in the unique 10-position harness design of the Stud Mount base.

Install with gaps for greater flexibility or butted together for maximum abrasion resistance, insulation and rigidity!

Spiral Wrap

- Packaged in 100 foot reels
- Protects bundles from .063" to 7" (1.6 mm to 177.8 mm) diameters
- Available in three material types
- Also commonly known as reverse cut, left-handed cut or counter-clockwise cut
- For use with cutting tool SR-100 (see page D-53)
- UL 94 HB Flammability Rating

Sold in 100-ft. rolls.

Polyethylene

Available in natural and weatherable black. For general indoor use to 122° F (50° C). Material is flexible and easy to work with.

Weatherable Polyethylene

Available in black only. Designed to resist ultraviolet light in outdoor applications.

Flame-Retardant Polyethylene

Available in white only. Material is UL® 94 V-0 rated. More economical and less rigid than nylon.

Nylon 6.6

Available in natural only. Offers highest abrasion resistance and rigidity. Self-extinguishing to UL 94 HB and a UL Recognized Component.

Fluoropolymer

Available in opaque color. Excellent resistance to harsh environments 338° F (170° C) max operating temperature.

Perfect for protection of bundles from .063" to 7" diameters.

Forward Cut Spiral Wrap

- Install with gaps for greater flexibility or butted together for maximum abrasion resistance, insulation, and rigidity
- Available in three materials
- Also known as right-hand cut or clockwise cut
- Use cutting tool SR-100 (pg D-53)

High-carbon, Teflon® coated steel blade!

SR-100 Cutting Tool

Use our SR-100 cutting tool for all your spiral wrap, plastic pipe and PVC conduit needs up to 1¼" I.D.

- Contoured handle resists tube crushing
- Produces no "sawdust" — no need to debur
- Lightweight, low-profile and no exposed blade when stored

CAT. NO.	DESCRIPTION
SR-100	Cutting Tool

Teflon® is a trademark of the DuPont Corporation.

Wire Protection Products

Line panel edges and knockouts!

Extruded Grommeting

- Used to line panel edges and knockouts where the chafing of passing wires is a concern
- Available in 8 stock sizes in 100-ft. lengths for panels from .040" (1.02 mm) to .250" (6.35 mm) thick
- A variety of stocked materials to cover a wide range of applications
- Solid Wall Polyethylene is ideal for protection of glass, sheet metal, wood panels, or other sheet-form materials

NOTE: Min. bend radius is 1/4".

Braided Wire Protection Sleeving

Available in handy mini spools or bulk reels!

Braided Expandable Wire Protection Sleeving

Thomas & Betts braided wire protection sleeving is used to bundle and protect wires and cables from abrasion and excessive wear. Its flexible, lightweight, open weave construction installs easily over a variety of bundle diameters and shapes. The sleeving is resistant to chemicals, fungus, fuels, UV sunlight, and has an indefinite shelf life. It's easily cut with a hot knife, which seals the end, preventing fraying. Ends can be secured using Ty-Rap® cable ties.

Available in:

- Handy mini spools or bulk reels
- Eight sizes from 1/8" (3.18 mm) to 2 1/2" (63.5 mm) nominal I.D. size
- Solid or wraparound hook and loop braided expandable wire sleeving
- Meets UL94V-1
- Meets Federal Motor Vehicle Standard No. FMV SS 302

Types of Materials

Polyethylene Terephthalate (P.E.T.)

A black 0.010" (.25mm) polyester monofilament material designed for indoor and outdoor applications. It's rated for continuous operating temp. -103° F to 257° F (-75° C to 125° C).

F - Flame Retardant Polyethylene Terephthalate (P.E.T.)

A 0.010" (.25 mm) self-extinguishing polyester monofilament material that can be used indoors and outdoors. It's provided in black with white tracer for identification, and is rated for continuous operating temp. -103° F to 257° F (-75° C to 125° C). Meets UL 94V-1 Flammability Rating.

The right tool for the job!

Sleeving End Cutter/Sealer Tools

It's recommended that the sleeving be cut with a hot knife for a straight cut and to seal the ends, which prevents fraying.

STD. PKG. CAT. NO.	DESCRIPTION	STD PKG.
WTBM	Benchmount End Cutter/Sealer Tool, 110V AC	1

The most comfortable and efficient hand tool available for installing cable ties!

Ty-Rap® Cable Tie Installation Tool

Thomas & Betts set out to develop a high performance and very reliable hand-operated cable tie installation tool. It's ergonomic with more features than any competing tool on the market. This new and improved Ty-Rap® Cable Tie Installation Tool is the result, and it fits the bill in every aspect.

Our engineers carefully considered user comfort and designed this rugged yet lightweight, well-balanced tool to reduce stress, fatigue and the risk of cumulative trauma injury to the hand and wrist. They didn't stop with ergonomics, however. This new tool offers a flush cable tie tail-to-head trim, a longer handle stroke requiring less handle force, higher tension capabilities and much, much more!

Designed for Efficiency

- Wide cable-tie insertion gap makes it easier to insert tie into tool
- Tension adjustment wheel on nose offers easy access and quick setting — about five times faster than competing tools!
- Tension-locking mechanism maintains constant tension setting, even when tool is frequently put down and picked up again
- Flush tail-to-head cut-off eliminates sharp cable tie ends that can cut or scratch installers, wires and nearby devices
- Longest stroke length available on the market — a full 1" — means fewer handle-tensioning cycles to save time and lower installation costs

Designed for Comfort

- 360° rotating nose offers maximum flexibility in any position, especially in tight spaces — no twisting of tool required!
- Adjustable grip span adapts to fit large or small hands
- Anti-recoil cut-off mechanism reduces shock and vibration to hand and wrist
- High-low handle travel feature offers lowest handle force with highest tension in any hand-operated cable tie installation tool on the market
- Handles constructed from rugged, lightweight, high-impact polymer in a balanced design with soft, over-molded, round-edged grips for added user comfort

Specifications

- Dimensions: 7" (177mm) L x 5" (127mm) H x 1 1/8" (41.3mm) W
- Weight: 9 oz. (255g)

STD. PKG. CAT. NO.	DESCRIPTION	STD. PKG. QTY.
ERG50	Tool for 18–50 lb. (80–222 N.) Cable Ties	1
ERG120	Tool for 50–120 lb. (222–533 N.) Cable Ties	1

Boost productivity and reduce user fatigue in demanding, high-volume cable tie installations!

Ty-Rap® Pneumatic Cable Tie Installation Tool

Ty-Rap® Cable Fastening Systems

For fast, consistent installation of cable ties in high-volume applications, you can't beat the new Ty-Rap® Pneumatic Cable Tie Installation Tool. Pneumatic power combined with a balanced, ergonomic design enables you to tension and trim large quantities of Ty-Rap® cable ties in rapid succession with accuracy and one-button ease.

- Easy, one-step tensioning and cut-off of cable ties
- Narrow nose rotates 360° to maneuver in tight spaces
- Easy-access tension-adjustment wheel at nose with locking mechanism for repetitive-tension work
- Spare cutting blade storage in handle
- Cuts tail off flush — no sharp ends to injure installers or damage cables
- Holds tails captive until ejected by operator — no mess to clean up
- Soft, over-molded grip with over-sized trigger
- Wide cable-tie insertion gap — no fumbling to insert tie

NEW!

Specifications

- Dimensions: 10"L x 6¼"H x 1½"D
- Weight: 14 oz.
- Operating Pressure: 85–100 psi (non-lubricated air)
- Cable Tie Tensile-Strength Range: 18–50 lbs.

CAT. NO.	DESCRIPTION	STD. PKG. QTY.
ERG50P	Pneumatic Cable Tie Installation Tool for 18–50 lb. Ties (includes 9-ft. air hose)	1

Tightens cable tie and cuts flush in one step

360° rotating nose for maximum flexibility

Narrow-shaped nose for easy reach in tight spaces

Ty-Rap® Cable Installation Tools

Lightweight. Economical. Durable.
Perfect for spot-tying!

Ty-Rap® Cable Tie Installation Tool — Light Duty

- Installs Ty-Rap cable ties up to .301" wide by .080" thick
- Designed for use by both left- and right-handed operators
- Lightweight, high-impact polymer and steel components

They cinch up the tie with a squeeze action, and cut away the excess tail when twisted 180°. A specially designed pawl cuts away the tail if the tension limit is exceeded, thereby preventing the cable tie from being over-tightened.

Tail twists right off — no tools needed!

Catamount® Twist Tail™ Cable Tie

NEW!

- Unique, patent-pending design for quick, easy, tool-less installation
- After installing, remove excess tail with a simple “bend, bend again and twist” motion
- Tail breaks off neat and clean — no sharp edges to damage hands or cables
- Ideal for limited-space installations where you can't fit a cut-off tool
- Suitable for any general-purpose cable tie application
- Available in white or UV resistant black 6.6 nylon

For fast and easy installation, you can't beat the Catamount® Twist Tail™ Cable Tie. After you secure the Twist Tail™ tie around a bundle of cables, simply grasp the excess tail between your thumb and forefinger, bend, bend in the other direction and twist. The tail breaks right off, leaving no sharp edges to scratch your hands or your cables. The Twist Tail cable tie makes tail removal easy with its unique, patent-pending design but still provides a full 50 lbs. minimum loop tensile strength — perfect for any general-purpose cable tie application.

Ty-Rap®

Catamount® Cable Ties

Catamount® Cable Fastening Systems

Catamount® Ties and Terminals fit the needs of general-purpose fastening and wire terminations. Installers quickly discover that Catamount products offer durable and value-priced cable bundling for a variety of commercial and residential construction applications. Electricians can also take advantage of other benefits in stocking Catamount products in their toolboxes, such as more terminals per bag in most popular sizes than leading comparable brands.

Catamount Ties and Terminals are offered in a wide range of sizes, styles and colors and meet listing requirements for most electrical termination and fastening projects. A choice of matching tools are also offered to provide quick and reliable installations.

MPNY-1000S-0-C	#6 Screw	Black Nylon

For use with 18–50 lb. Cable Ties

- Mounting Surface should be cleaned with alcohol based (IPA) cleaner before application
- Acrylic Based may be repositioned initially. Allow 24–72 hours setup for maximum performance with Acrylic Based adhesives
- For Rubber Based, allow 15 minutes setup for maximum performance
