### Nice small size screwdrivers

This is the set to have for small (smaller) screw heads, where a longer screwdriver is needed. The smallest sizes are fine enough even for watch screws, e.g., as one that holds a wrist watch battery. I augmented the set by purchasing a separate smaller Precision Slotted .80 (1/32") x 40mm screwdriver. This set in the pouch happened to be on sale, which decided on my purchase. The pouch is well made - but one has to decide if this is practical of have the tools in a stand or a toolbox. Without the sale price I would buy from this series just the three smallest sizes. The larger duplicate some of the "usual" sizes one likely already has.
