Connecting the Classroom with Tripp Lite

Technology is quickly transforming traditional K-12 classrooms into network environments. Tripp Lite offers robust IT solutions to support school districts and educators at all levels as they strive to engage students with modern, interactive learning tools while keeping expenditures under control.

Charging, Syncing & Securing Mobile Devices

A Charging Stations & Carts

Protect your school's financial investment and simplify the use of mobile learning tools in the classroom.

- Locking steel enclosures deter theft during charging and storage.
- Instructors can easily update devices with wired syncing (USB models) or take advantage of compatibility with wireless syncing.
- Cable management promotes organization of devices and cords.
- Carts make it simple to move groups of devices from room to room.
- Desktop stations offer a compact option for charging and securing tablets.

Sharing Your Message

B Cables, Connectivity Solutions & USB Solutions

Connect devices to a Gigabit Ethernet network or show HD video on a large display. Use adapters to integrate new tech, like USB-C enabled laptops, with existing setups, reducing the need for costly upgrades.

C Display Mounts & Mobile Stands

Mount HDTVs or monitors on a wall to optimize viewing angles, plus move displays from room to room with new mobile floor stands.

D Keyspan® Presentation Remotes

Control presentation software from anywhere in the room with a wireless remote. Simple, intuitive operation keeps the focus on the lesson plan.

Protecting Equipment

E Desktop UPS Systems

In the case of a blackout, UPS systems provide enough time for instructors to perform an orderly shutdown of computers, saving data that might otherwise be lost.

F Surge Protectors

Keep equipment safe from power surges and reduce line noise (EMI/RFI) interference.

G Wall-Mount Racks

Save valuable floor space and keep equipment out of the way. Rack enclosures secure equipment in a locking cabinet to help prevent damage, tampering and theft.
