

Set-Screw Vibration Proof / Visible Connection

The Marrette® Set-Screw is a two-piece, pressure type connector, featuring a solid brass insert with a screw-on insulating cap. It's the perfect choice when changing a motor, adding a circuit, conducting instrument testing or simply lashing-up temporary wiring.

External Cap

- Made of rugged, thermoplastic polymer material 150°C rated.
- Insulator cap locks securely in place to safeguard against accidental loosening in high vibration applications.

Inner Sleeve + Screw

- Choice of Slotted or Robertson screw-driver installation. When tightened into the insert, provides a solid pressure type connection on all approved wire combinations.
- No need to "re-strip" wires when rewiring. Simply loosen set screw to remove non-twisted wires.
- Brass sleeve + set-screw help resist corrosion.
- Approved for circuits up to 600 V, and lighting fixtures and signs up to 1000 V.
- For copper conductor only.
- Convenient packaging - sized right and job-site ready!

Set-Screw Vibration Proof / Visible Connection
